COMMISSION MEMBERS

(AUGUST 1977)

PRIVATE CITIZENS

Robert E. Merriam, Chairman, Chicago, Illinois
F. Clifton White, Greenwich, Connecticut
Richard W. Riley, Greenville, South Carolina

MEMBERS OF THE UNITED STATES SENATE

Lawton Chiles, Florida
William Hathaway, Maine
William V. Roth, Delaware

MEMBERS OF THE U.S. HOUSE OF REPRESENTATIVES

Clarence J. Brown, Jr., Ohio
L. H. Fountain, North Carolina
Charles B. Rangel, New York

OFFICERS OF THE EXECUTIVE BRANCH, FEDERAL GOVERNMENT

W. Michael Blumenthal, Secretary of the Treasury
Juanita M. Kreps, Secretary of Commerce
Vacancy

GOVERNORS

Reubin O'D. Askew, Florida
Otis R. Bowen, Indiana
Richard F. Kneip, South Dakota
Richard A. Snelling, Vermont

MAYORS

Harry E. Kinney, Albuquerque, New Mexico
Jack D. Maltester, San Leandro, California
Tom Moody, Columbus, Ohio
Vacancy

MEMBERS OF STATE LEGISLATIVE BODIES

John H. Briscoe, Speaker, Maryland House of Delegates
Charles F. Kurfess, Minority Leader, Ohio House of Representatives
Martin O. Sabo, Speaker, Minnesota House of Representatives

ELECTED COUNTY OFFICIALS

Lynn G. Cutler, Chairperson, Board of Supervisors, Black Hawk County, Iowa
Doris W. Dealaman, Freeholder Director, Somerset County, New Jersey
William E. Dunn, Commissioner, Salt Lake County, Utah

FOREWORD

As part of its continuing research on fiscal federalism, the Advisory Commission on Intergovernmental Relations believes it is useful to determine public attitudes on major intergovernmental fiscal issues. Each year since 1972, the Commission has contracted with Opinion Research Corporation of Princeton, New Jersey, to gauge public opinion as to tax instruments, Federal aid, and effectiveness of the levels of government. This publication presents both the current and cumulative record of these surveys.

This study was prepared by Will Myers, senior analyst, and John Shannon, assistant director, of the Commission's public finance staff. All interpretations of the data are those of the Commission's staff.

Robert E. Merriam

The 1977 Survey

Summary of Findings	1
The Most Popular Level of Government	3
The Level of Government Services and Taxes	7
The Worst Tax	11
Special Federal Aid to Cities	15
Tax Breaks and Other Incentives to Attract and Hold Industries	19
The Poll	36

Tables

Tables 1 and 1A —Responses to the question: From which level of government do you feel you get the most for your money— Federal, state, or local?	3
Tables 2 and 2A —Responses to the question: Considering all government services on the one hand and taxes on the other, which of the following statements comes closest to your view? Keep taxes and services about where they are. Decrease services and taxes. Increase services and raise taxes. No opinion	7
Tables 3 and 3A —Responses to the question: Which do you think is the worst tax— that is, the least fair?	11
Tables 4 and 4A —Responses to the question: Many of our major central cities are experiencing financial difficulty. Would you favor or oppose special Federal aid for these central cities?	15
Tables 5 and 5A —Responses to the question: Some states have passed laws which give special tax breaks or other incentives to industries that will locate facilities or expand present operations in the state. Do you favor or oppose this policy?	19

Appendix Tables

<p>Table A—Responses to the question: From which level of government do you feel you get the most for your money—Federal, state, or local? (1975, 1974, 1973, 1972)</p>	26
<p>Table B—Responses to the question: Considering all government services on the one hand and taxes on the other, which of the following statements comes closest to your view? (1975)</p>	28
<p>Table C—Responses to the question: Suppose your state government must raise taxes substantially, which of these do you think would be the best way to do it? (1972)</p>	29
<p>Table D—Responses to the question: In addition to providing certain moneys to state and local governments for specific purposes, the national government also gives a form of Federal aid called revenue sharing. Under this program, state and local governments receive about \$6 billion a year to use as they think best. Do you favor or oppose this revenue sharing form of Federal aid? (1975)</p>	30
<p>Table E—Responses to the question: Here is a list of the major types of taxes in the country today. Which do you think is the fairest? (1974, 1972)</p>	31
<p>Table F—Responses to the question: Which do you think is the worst tax—that is, the least fair? (1975, 1974, 1973, 1972)</p>	32
<p>Table G—Responses to the question: Here are some reasons that people give us for feeling that the property tax is not a good tax. Which one of these do you feel is the most important reason for dissatisfaction with the property tax? (1974)</p>	34
<p>Table H—Responses to the question: Here are three statements about taxes, which of the statements agrees most with your own thinking? (1972)</p>	35
<p>Table I—Responses to the question: Suppose the Federal government must raise taxes substantially, which of these do you think would be the best way to do it? Which do you think would be the next best way? (1972)</p>	36

Table J—Responses to the question: Many of our major central cities are experiencing financial difficulty. Would you favor or oppose special Federal aid for these central cities (1976)?..... 37

The 1977 Survey

Summary of Findings

This year's ACIR poll of public attitudes on major intergovernmental issues repeats several questions asked in earlier polls and raises one new issue — should states grant special tax breaks in order to promote industrial development?

There are no big surprises when the results of this year's survey are compared to the base lines established by previous polls. While the federal government continues to muster the most votes (36%) from respondents asked to select the most efficient level of government, state and local governments have not lost any of their support (Question 1).

There was also no major shift in public thinking about the proper size of the public sector. The vast majority of respondents favor either a "hold the line" policy or a cutback in taxes and services (Question 2).

A fairly significant shift occurred in public attitudes on major federal, state, and local taxes. The local property tax has again emerged as the worst tax — the least fair — in the view of the American public (Question 3). In the years between '72 and '77, the property tax vied with the federal income tax for this dubious honor. Inflation and its effect on market values and assessments apparently stiffened public opposition to the property tax — 33% of the public termed the property tax least fair in 1977 as compared to only 29% who held this

opinion in 1975. The state sales tax was the apparent beneficiary of the increasing unpopularity of the property tax in this "zero sum" game. In 1977, 17% of the public mentioned the sales tax as least fair, down from 23% in 1975.

The American public continues to be of two minds when asked whether it favors special federal aid for central cities in financial difficulty — 43% favor the idea, 44% are opposed (Question 4).

The general continuity of poll results from year to year can be attributed in large part to the fact that the various groups within the body politic hold fairly fixed, albeit contrasting, views on many of the major intergovernmental issues. Those in the low income group, for example, tend to be the most supportive of the federal government; while those in the highest income class are more apt to give local government their vote of confidence. The report illustrates this range of views among categories of respondents in order to call attention to these important variations.

In response to our new question about the desirability of granting special tax breaks to industry, the respondents revealed marked regional differences. Fifty-seven percent of those in the northeast favor such a policy, while only 42% in the west support it (Question 5). These responses underscore the growing concern of the "frostbelt" states for spurring economic development.

The Most Popular Level of Government

Table 1

From Which Level of Government Do You Feel You Get the Most
for Your Money — Federal, State, or Local?

Percent of Total U.S. Public

	May 1977	March 1976	May 1975	April 1974	May 1973	March 1972
Federal	36%	36%	38%	29%	35%	39%
Local	26	25	25	28	25	26
State	20	20	20	24	18	18
Don't Know	18	19	17	19	22	17

When 1977 national totals are broken down by respondent category, they reveal the following striking contrasts:

Most Popular Level of Government	Respondent Category	Percent of Total U.S. Public
Federal Most Popular	Age: 60 and over	45%
	30 thru 44	29
State Most Popular	Occupation: Retired	45
	Exec., Prof., Mgrl.	23
Local Most Popular	Status of Dwelling: Renters	25
	Owners	18
Local Most Popular	Education: College Grad.	43
	Less than H.S. Grad.	16
Local Most Popular	Occupation: Exec., Prof., Mgrl.	42
	Retired	17
Local Most Popular	Household Income: \$25,000 +	48
	Under \$7,000	15

For additional detail, see **Table 1A** on page 4.

Special Federal Aid to Cities

Table 4

Many of Our Major Central Cities are Experiencing Financial Difficulty. Would You Favor or Oppose Special Federal Aid for These Central Cities?

	Percent of Total U.S. Public		Percent of Respondents by Region			
	May '77	Mar. '76	Northeast ¹	North Central	South	West
	Favor	43%	48%	58%	38%	38%
Oppose	44	40	34	48	47	47
No Opinion	12	12	8	13	15	11

When 1977 national totals are broken down by respondent category, they reveal the following striking contrasts:

Extent of Support	Respondent Category	Percent of Total U.S. Public
In Favor of Aid to Cities	Age: 18 thru 29	55%
	60 and over	33
	Race: Nonwhite	58
	White	41
	Status of Dwelling: Renters	56
	Owners	36
In Opposition to Aid to Cities	Household Income: \$25,000 +	58
	Under \$7,000	35
	Dwelling Location: Rural	52
	City	41
	Education: College Grad.	52
	Less than H.S. Grad.	39

¹In 1976, 70% of the respondents in the Northeast favored federal aid for these cities. In the remaining regions, the contrast between 1977 and 1976 results for those favoring aid was much less marked.

For additional detail, see **Table 4A**, on page 16.

THE POLL

This report presents the findings of a personal interview research survey conducted among a probability sample of 2,009 men and women, 18 years of age or over, living in private households in the continental United States.

Interviewing for this Caravan survey was completed during the period May 14 through June 2, 1977, by members of the Opinion Research Corporation national interviewing staff. All interviews were conducted in the homes of respondents, using a thoroughly pretested questionnaire.

The most advanced probability sampling techniques were employed in the selection of interviewing households and random selection of a designated respondent within the household. One callback was required in all cases where the originally designated respondent was not available at the time of the initial call to that housing unit. Only one interview was conducted per household. To further ensure the representativeness of the sample, data were subject to ORC's weighting program, which takes into account probability of being at home and six different demographic variables. Therefore, the results may be projected to the total U.S. population of men and women, 18 years of age or over.

Introduction to Detailed Findings

The tables contained in this report present detailed findings of the survey results. Where percentages add to more than 100, it is because of multiple answers.

The following definitions are provided for some of the standard sidebreaks by which the data are analyzed. Other sidebreaks are self-explanatory.

Occupation refers to the occupation of the chief wage earner in the family. The 1977 questionnaire uses the Hollingshead classifications shown at the left below; the sidebreak collapses them as shown at the right and adds a retired classification.

The *city size* groups all respondents into one of three major categories — rural, suburb, or city — and is based on interviewer observation of the respondent's location in terms of rural, suburb and city, and the age and type of dwelling.

City dwellers are divided into two groups — those living in single family versus multi-family dwellings.

The four geographic regions are comprised as follows: Northeast — Maine, New Hampshire, Vermont, Massachusetts, Rhode Island, Connecti-

Hollingshead Classification

Higher Executives, Large Business Owners, Major Professionals
 Business Manager, Medium Business Owners, Lesser Professionals
 Administrative, Small Business Owners, Semiprofessionals
 Clerical/Sales Workers, Technicians, Little Business Owners
 Skilled Manual Employees
 Machine Operators, Semiskilled Employees
 Unskilled Employees

Sidebreak Groupings

Executive/Professional/Managerial
 White Collar
 Blue Collar Skilled Semi/Unskilled
 Retired

cut, New York, New Jersey, Pennsylvania; North Central — Ohio, Indiana, Illinois, Michigan, Wisconsin, Minnesota, Iowa, Missouri, North Dakota, South Dakota, Nebraska, Kansas; South — Delaware, Maryland, District of Columbia, Virginia, West Virginia, North Carolina, South Carolina, Georgia, Florida, Kentucky, Tennessee, Alabama, Mississippi, Arkansas, Louisiana, Oklahoma, Texas; West — Montana, Idaho, Wyoming, Colorado, New Mexico, Arizona, Utah, Nevada, Washington, Oregon, California.

The *Nielsen Market Size* groups respondents by A.C. Nielsen Company market size:

- A — All counties comprising the 25 largest metropolitan areas;
 - B — All other counties having a population of 150,000 or more, or that form part of a metropolitan area having a total population of 150,000 or more;
 - C — All other counties having a population of 35,000 or more, or forming part of a metropolitan area having a population of 35,000 or more; and
 - D — All remaining counties in the country.
- Income* groups respondents by total family income in 1976, before taxes.

TABLE G

Here are Some of the Reasons that People Give Us for Feeling that the Property Tax is Not a Good Tax. Which one of These Do You Feel is the Most Important Reason for Dissatisfaction With the Property Tax?

- (in percent)
1. It is hardest on low income families.
 2. It is based on estimates of home value that are not always fair.
 3. Reassessments may sometimes result in a shocking tax bill increase.
 4. It discourages homeowning.
 5. It taxes any increase in the value of a home over the original purchase price, even though that increase is only on paper and not in the homeowner's hands unless he sells the house.
 6. Property taxes have been going up faster than other taxes.
 7. No opinion.
 8. Don't agree that property tax is not a good tax.

TABLE H

Here are Three Statements About Taxes. Which of the Statements Agrees Most with Your Own Thinking?
(in percent)

1. The Federal government should start a value added tax (a form of national sales tax) and use the money to help reduce local property taxes.
2. The Federal government should not start a value added tax (a form of national sales tax) but should raise individual income taxes to help reduce local property taxes.
3. The Federal government should take neither of these actions to help reduce local property taxes.
4. Don't know.

TABLE I

A. Suppose the Federal Government Must Raise Taxes Substantially, Which of These do You Think Would be the Best Way to Do It? **B. Which Do You Think Would be the Next Best Way?**

(in percent)

1. Collect a value added tax (VAT), a form of national sales tax on things other than food and similar necessities.
2. Raise individual income tax rates.
3. Raise money by reducing special tax treatment for capital gains and cutting tax deduction allowances for charitable contributions, state and local taxes, medical expenses, etc.
4. Don't know.

- Understanding State and Local Cash Management*, An Information Report M-112, Washington, D.C.: U.S. Government Printing Office, May 1977, 80 pp.

what is ACIR?

The Advisory Commission on Intergovernmental Relations (ACIR) was created by the Congress in 1959 to monitor the operation of the American federal system and to recommend improvements. ACIR is a permanent national bipartisan body representing the executive and legislative branches of Federal, state, and local government and the public.

The Commission is composed of 26 members—nine representing the Federal government, 14 representing state and local government, and three representing the public. The President appoints 20—three private citizens and three Federal executive officials directly and four governors, three state legislators, four mayors, and three elected county officials from slates nominated by the National Governors' Conference, the Council of State Governments, the National League of Cities/U.S. Conference of Mayors, and the National Association of Counties. The three Senators are chosen by the President of the Senate and the three Congressmen by the Speaker of the House.

Each Commission member serves a two year term and may be reappointed.

As a continuing body, the Commission approaches its work by addressing itself to specific issues and problems, the resolution of which would produce improved cooperation among the levels of government and more effective functioning of the federal system. In addition to dealing with the all important functional and structural relationships among the various governments, the Commission has also extensively studied critical stresses currently being placed on traditional governmental taxing practices. One of the long range efforts of the Commission has been to seek ways to improve Federal, state, and local governmental taxing practices and policies to achieve equitable allocation of resources, increased efficiency in collection and administration, and reduced compliance burdens upon the taxpayers.

Studies undertaken by the Commission have dealt with subjects as diverse as transportation and as specific as state taxation of out-of-state depositories; as wide ranging as substate regionalism to the more specialized issue of local revenue diversification. In selecting items for the work program, the Commission considers the relative importance and urgency of the problem, its manageability from the point of view of finances and staff available to ACIR and the extent to which the Commission can make a fruitful contribution toward the solution of the problem.

After selecting specific intergovernmental issues for investigation, ACIR follows a multistep procedure that assures review and comment by representatives of all points of view, all affected levels of government, technical experts, and interested groups. The Commission then debates each issue and formulates its policy position. Commission findings and recommendations are published and draft bills and executive orders developed to assist in implementing ACIR policies.
