FOREWORD $\mathrm{T}_{\mathrm{t} \text { is }}$ s the eent annua sunee of pubicic atittudes toward government and taxes. Each year since 1972, ACIR has contracted with Opinion Research Corporation of Princeton, NJ, to conduct this survey. This year ACIR asked five questions - two for the first time; this publication presents both the current results and the cumulative record.
L. R. Gabler, senior analyst, prepared this study, with typing assistance provided by Shari Quick. The study was under the general supervision of John Shannon, Assistant Director for Taxation and Finance.

All interpretations of the data are those of the Commission's staff.

## HIGHLIGHTS

he 1981 survey of public attitudes toward governments and taxes is the tenth consecutive survey conducted for ACIR by the Opinion Research Corporation.

## The Aid to the Needy Public Welfare Distinction

In a very timely and specific way, this year's survey substantiates what public opinion pollsters have found in the past, that changes in terminology can lead to major changes in public response.

When ACIR used the term "aid to the needy," only a relatively small proportion of the respondents singled out this program to be cut back. However, when the term "public welfare programs" was used in exactly the same question, there was a dramatic increase in those who selected this program for curtailment.

Actually, ACIR experimented with. this terminology difference in connection with two questions in this study. One question related to cutbacks in the state-local public sector while the
second referred to programs that the federal government should turn back to state and local governments. Both questions were asked in several polls in identical form except for the wording change-from "aid to the needy" to "public welfare."

Last year when ACIR asked the public to choose those areas of the state-local budget they felt most appropriate for curtailment, the low percentage of respondents ( $8 \%$ ) selecting the "aid to the needy" category suggested that the connotation of this term was so altruistic that most respondents felt they could not, or should not select this category for cutback.

This year ACIR tested the possibility of an altruistic bias attributable to this term. Since our regular survey could not be run until September or later, rather than in the spring as had been the case in past years, ACIR accepted the gratis offer by Opinion Research Corporation to run the questions also as part of an August telephone poll. In the August telephone poll, the phrase "public welfare programs" was used.

When the August results became available, they revealed a dramatic increase in the propor-
tion of respondents ( $39 \%$ ) selecting the "public welfare programs" alternative. When the regular public survey was run in September, the term "aid to the needy" was used to maintain strict comparability with one of the questions that had been asked last year (when $7 \%$ of the respondents endorsed this category for a cutback). The sharp difference in the August and September results emphasized the importance of terminology. This led ACIR to have Opinion Research Corporation again run the same two questions affected by this term-this time in the October telephone survey and substituting the words "aid to the needy" for "public welfare programs." In October, $9 \%$ supported a cutback in "aid to the needy." Thus, the survey technique was held "constant" in the August and October telephone polls and the differences in response could be attributed to the different terminology.
Additional highlights of this year's survey of public attitudes are:

- More people $(36 \%)$ selected the federal income tax as the nation's worst tax, though the local property tax is a close second (selected by $33 \%$ of the respondents). ${ }^{1}$

[^0]- Local governments are thought to provide the most service for the taxpayer's dollar by $33 \%$ of those surveyed, with the federal government selected by $30 \%{ }^{1}$
- Charges for specific services are far and away the preferred way for local governments to raise additional revenue if that should be necessary.

Further detail explaining these highlights is contained in the following sections that set forth each of the questions and interpretations of the responses.

## Rating "Cutback" Candidates

If governments must retrench, "public welfare" programs are the place to do it according to respondents in the August telephone poll. However, as we already have noted, when the term "public welfare" was replaced by the phrase "aid to the needy," respondents to both the September regular survey and the October telephone survey placed this category at or near the bottom of the list of cutback preferences.
The specific state-local question and the public response are shown in Table 1.

Table 1
Suppose the Budgets of Your State and Local Government Have to Be Curtailed,
Which of These Parts Would You Limit Most Severely?

|  | Percent of U.S. Public |  |  |  |
| :---: | :---: | :---: | :---: | :---: |

|  | May 1980 | $\begin{gathered} \text { August } \\ 1981 \end{gathered}$ | $\begin{gathered} \text { October } \\ 1981 \end{gathered}$ | $\begin{gathered} \hline \text { September } \\ 1981 \end{gathered}$ |
| 1. Public Safety (fire, police, criminal justice) | 2 | 4 | 4 | 3 |
| 2. Public Schools (kindergarten-12th grade) | 3 | 7 | 8 | 3 |
| 3. Tax-Supported Colleges and Universities | 23 | 10 | 16 | 24 |
| 4A. Aid to the Needy | 8 | x | 9 | 7 |
| 4B. Public Welfare Programs | x | 39 | $\mathbf{x}$ | x |
| 5. Streets and Highways | 11 | 9 | 13 | 10 |
| 6. Parks and Recreation | 40 | 24 | 36 | 45 |
| 7. None of These | $\times$ | x | 6 | x |
| 8. Don't Know | 12 | 9 | 8 | 10 |
| x -indicates this choice was not offered in the survey. |  |  |  |  |

At least two explanations can be offered to reconcile this sharp difference. Undoubtedly, many respondents believe that welfare programs are not restricted to those truly in need-that through either legal or administrative flaws, problems of waste, inefficiency and fraud exist. For other respondents, semantics may play a part. It is possible that the public perception of "needy" is so altruistic and the term "public welfare" so negative that each produces an overreaction, albeit in opposite directions.
This is substantially what Ladd and Lipset have found. They state:

About the only service most people want to reduce is welfare. But detailed explorations of what people mean by the welfare programs they would like to reduce, strongly suggest that they have "welfare chiselers" in mind. Many people believe that the welfare rolls are grossly inflated by the presence of ablebodied persons who should be required to take jobs. But the same polls that find that the public would like to reduce welfare also report that they oppose cuts
for the elderly and special education or services for blacks, the poor, the handicapped, or the needy. Seemingly, many of the same people who object to welfare (read "welfare chiselers") continue to back the welfare state. ${ }^{2}$

What did not affect the results in any significant way, however, was the two different survey techniques. Both the "public welfare" and "aid to the needy" choices were posed by the telephone procedure. When the aid to the needy terminology was used, the proportion selecting the category was $9 \%$ (October 1981)-quite in line with the $7 \%$ finding in the personal interview survey (September 1981).

The same reasons help to explain the comparable "welfare" vs. "aid to the needy" response pattern that emerged when the public was asked, for the first time, to select domestic expenditure areas from which the federal govern-

[^1]Table 2

## President Reagan Has Indicated He Would Like to Turn a Number of Programs B'ack to the State and Local Governments and Get the Federal Government Completely Out of the Financing and Administration of Such Programs. Various Leaders and Organizations Have Proposed That the Following Functions Be Turned Back. From Which Functions Would You Like to See the Federal Government Withdraw?

|  | Percent of U.S. Public |  |  |
| :---: | :---: | :---: | :---: |
|  | Telephone Survey |  | Regular Survey |
|  | $\begin{aligned} & \hline \text { August } \\ & \text { 1981* } \end{aligned}$ | $\begin{gathered} \hline \text { October } \\ 1981^{*} \\ \hline \end{gathered}$ | $\begin{gathered} \hline \text { September } \\ 1981^{*} \\ \hline \end{gathered}$ |
| 1. Public Schools | 30 | 30 | 26 |

| 10. Don't Know <br> $x$-indicates this choice was not offered in the survey. | 8 | 10 | 13 |

ment should withdraw. Specifically, the question and the public response can be found in Table 2.

When the choice read welfare (including aid to families with dependent children and medicaid), it was selected by $39 \%$ of the August 1981 telephone respondents, the highest proportion registered among the functional areas for possible federal withdrawal. When the "aid to the needy" phrase was used in the September and October 1981, polls, it received the lowest proportion among the specific functional areas enumerated.

The public response also indicates no hard and fast attitudes toward sorting out functional responsibilities as between the federal and statelocal sectors. The poll does not show strong public support for complete federal withdrawal from any specific program; no overriding majority of respondents selected any functional category for complete federal withdrawal. Indeed, aside from the $39 \%$ who chose public welfare in the August 1981 survey, the next highest reading in favor of exclusive state-local responsibility for any of the categories was the $32 \%$ selecting the day care and other social services designation. To state the same result positively, with the public welfare exception, more than two out of every three respondents favored some continuation of federal support, either financial or administrative, for each function enumerated.

Again, the importance of terminology is apparent. When the term "public welfare" is used, it is the function most frequently selected for complete state-local takeover - a result in striking contrast to the position of many students of federalism. When the phrase "aid to the needy" is
substituted, however, only $15 \%$ of the respondents favor complete federal withdrawal-the lowest percentage (along with the public hospitals and health category) among the specific functional choices.

## Rating Major Taxes

The federal income tax was chosen by more people ( $36 \%$ ) as the worst tax - that is, least fairof the nation's major taxes for the third year in a row. This year, however, the local property tax placed a close second, selected by $33 \%$ of the respondents. ${ }^{3}$

State income and sales taxes continued to register far lower levels of taxpayer discontent, as has consistently been the case. In the 1981 survey, only $14 \%$ chose the state sales tax as the worst tax and only $9 \%$ selected the state income tax as the least fair (see Table 3).

While more people chose the federal income tax as the worst tax-reflecting, at least in part, the continuing "bracket creep" caused by inflation and other "income tax inequities" that were highlighted during the debate of the 1981 tax cut -this proportion has remained virtually constant for the past three years. The greatest change in this year's results is the sharp increase in the proportion of respondents selecting the local property tax as the nation's worst tax source. This

[^2]|  | Percent of U.S. Public |  |  |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | September 1981 |  | $\begin{aligned} & \text { May } \\ & 1980 \end{aligned}$ | $\begin{aligned} & \text { May } \\ & 1979 \end{aligned}$ | May <br> 1978 | $\begin{aligned} & \text { May } \\ & 1977 \end{aligned}$ | $\begin{aligned} & \text { May } \\ & 1975 \end{aligned}$ | April <br> 1974 | $\begin{aligned} & \text { May } \\ & 1973 \end{aligned}$ | March 1972 |
| Federal Income Tax | 36 | 36 | 36 | 37 | 30 | 28 | 28 | 30 | 30 | 19 |
| State Income Tax | 11 | 9 | 10 | 8 | 11 | 11 | 11 | 10 | 10 | 13 |
| State Sales Tax | 1.4 | 14 | 19 | 15 | 18 | 17 | 23 | 20 | 20 | 13 |
| Local Property Tax | 30 | 33 | 25 | 27 | 32 | 33 | 29 | 28 | 31 | 45 |
| Don't Know | 9 | 9 | 10 | 13 | 10 | 11 | 10 | 14 | 11 | 11 |

eight percentage point increase from last year represents not only a reversal from the downward movement of the previous two years but the 1981 level also stands as the second highest "unfavorable" reading for the property taxequal to the level of discontent recorded in May 1977, and exceeded only by the findings of the initial ACIR survey taken in March 1972.

The individuals that chose the federal income tax as the worst tax are sharply different from those that selected the local property tax as being least fair. The groups with the most decisive tax preferences were:

## Groups Selecting*

The Federal Income Tax as the Worst Tax Those under 44, high school education or better, with children, urban residents, residents of the South.

## The Local Property Tax as the Worst Tax

Those 45 and older, less than high school education, without children, rural residents, residents of the Northeast.
*These various categories, it should be noted, are not mutually exclusive. That is, individuals are placed in each of the categories whose characteristics they fit. As a result, the same individual is counted in several of the demo-graphic-socioeconomic categories and it cannot be determined which of his or her several characteristics is the decisive determinant of the revealed attitudinal preference.

Other "opposite" groupings, however, were not on opposite sides in the income tax-property tax choice. Both owners and renters selected the federal income tax as the worst tax as did both nonwhites and whites, blue and white collar workers, and residents of both small and large metropolitan areas ( 50,000 to 999,999 vs. 1 million and over).

Last year's findings indicated that residents of the Northeast region considered the state sales tax second to the federal income tax as the nation's worst tax. This was due at least in part to the high sales tax rates of New York and Connecticut. This year, however, residents of those states placed the sales tax in its more traditional third place position, behind both the federal income and local property taxes.

## Rating Governments

For the second time in the past three years, and only the second time in the ten years that ACIR has asked this question, more people - 33\% -selected local governments as providing the most for the taxpayer's money. ${ }^{4}$ The 1981 results placed the federal government a close second chosen by $30 \%$ of the respondents - and the state sector third, preferred by $25 \%$ of the respondents (Table 4).

Not only is the pattern of preference among governmental levels different this year, but the

[^3]Table 4

## From Which Level of Government Do You Feel You Get the Most For Your Money - Federal, State, or Local?

## Percent of U.S. Public

|  | September 1981 |  | $\begin{aligned} & \text { May } \\ & 1980 \end{aligned}$ | $\begin{aligned} & \text { May } \\ & 1979 \end{aligned}$ | $\begin{aligned} & \text { May } \\ & 1978 \end{aligned}$ | $\begin{aligned} & \text { May } \\ & 1977 \end{aligned}$ | March $1976$ | $\begin{aligned} & \text { May } \\ & 1975 \end{aligned}$ | $\begin{gathered} \text { April } \\ 1974 \end{gathered}$ | May $1973$ | March $1972$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Federal | 35 | 30 | 33 | 29 | 35 | 36 | 36 | 38 | 29 | 35 | 39 |
| Local | 28 | 33 | 26 | 33 | 26 | 26 | 25 | 25 | 28 | 25 | 26 |
| State | 20 | 25 | 22 | 22 | 20 | 20 | 20 | 20 | 24 | 18 | 18 |
| Don't Know | 17 | 14 | 19 | 16 | 19 | 18 | 19 | 17 | 19 | 22 | 17 |

level of support registered for each sector is at or near to its extreme reading. That is, the $33 \%$ selecting local governments as providing the most for the respondent's tax dollar equals the peak achieved by this governmental sector in the May 1979, survey - the only other year that local governments placed first. By way of contrast, the $30 \%$ selecting the federal government as providing the most is the second lowest percentage ever, exceeding only the $29 \%$ troughs registered both in May 1979, and April 1974. State governments, which continue to place third, were nonetheless chosen by $25 \%$ of the respondents as providing the most-and this represents the highest level scored in the ten years ACIR has asked this question. Thus, 1981 public attitudes reveal both state and local governments at their peak readings while the federal sector is near to its lowest level regarding public attitudes toward the governmental sector providing the most for the tax dollar.
The sharpest change to emerge in this year's survey was the seven percentage point increase in those selecting the local government sector as most efficient. This reflected particularly de-
cisive changes in the attitudes of several population classifications towards local governments. For example,

By Age: the young (aged 18 to 29) registered a ten percentage point increase; females of this age group, +11 ; those 60 and over recorded an 11 percentage point increase; and males of this age category, +16 .
By Occupation: blue collar workers, +14 ; both skilled, +14 ; and semi or unskilled, +13 percentage points.
By Region: those residing in the Northcentral states, +13 ; and those living in the West, +9 percentage points.
By Income Level: those earning less than $\$ 10,000$, +10 ; and those earning $\$ 15,000$ to $\$ 24,999,+8$ percentage points.
Those population groups giving the greatest and least support to the different governmental levels are shown in Figure 1.

Figure 1.

## RATING GOVERNMENTS

## Local Governments

( $33 \%$ nationwide)

## GREATEST SUPPORT

College graduates ( $46 \%$ ),
Executive-professional-managerial occupations (42\%),
Those earning $\$ 35,000$ and over ( $43 \%$ ).

Skilled blue-collar workers ( $32 \%$ ), Rural residents ( $29 \%$ ),
Those earning \$25,000-\$29,999 (36\%), Western state residents ( $30 \%$ ).

Nonwhites ( $42 \%$ ),
Residents of the Northeast ( $38 \%$ ), Males 60 and over ( $36 \%$ ),
Those with household income between $\$ 10,000$ and $\$ 14,999(35 \%)$.

## State Governments

( $25 \%$ nation wide)

Federal Government
(30\% nation wide)

## LEAST SUPPORT

Females 60 and over ( $24 \%$ ),
Those with less than a high school education (25\%),
Nonwhites ( $25 \%$ ).

The elderly ( $18 \%$ ), both male ( $15 \%$ ) and female ( $20 \%$ ),
Northeastern state residents ( $19 \%$ ).

Skilled blue-collar workers ( $19 \%$ ),
College graduates ( $22 \%$ ),
Residents of Western states ( $22 \%$ ).

## Rating Sources of Additional Local Revenue

If local governments must raise more revenue, charges for specific services are far and away the first choice as "the best way to do it", being selected by a margin of better than 2.5 -to- 1 over the next most frequently chosen finance instrument, local sales taxes.

Only $7 \%$ of the respondents nationwide felt that a local income tax was the best way to raise needed revenues, and only $5 \%$-lowest for the four tax sources-selected the mainstay of local. government finance, the property tax.

| Table 5 |  |  |
| :---: | :---: | :---: |
| Suppose Your Local Government Must |  |  |
| Raise More Revenue, Which of These |  |  |
| Do You Think Would Be The Best |  |  |
| Way To Do It? |  |  |
| Percent of U.S. Public |  |  |
| September |  |  |
|  | 1981 |  |
|  | 7 |  |
| Local Income Tax | 21 |  |
| Local Sales Tax | 5 |  |
| Local Property Tax | 55 |  |
| Charges for Specific Services | 12 |  |
| Don't Know |  |  |

Despite some variations in support both among and within certain classifications, charges for specific services were the first choice to raise needed added revenue for local governments among all major socioeconomic-demographic groupings.

Charging for specific services received greatest support from the young, those 44 and under, white-collar workers, those earning $\$ 25,000$ and over and residents of the Northeastern states (where user charge financing is relatively light). This source of local finance received less support from those 60 and over, rural residents, those earning $\$ 15,000$ and less, and residents of the Southern states (jurisdictions that now make above average use of service charges).

Local sales taxes, which were the uniform second choice of all population classifications, received above average support from those 45 and over, blue-collar workers, rural residents and those with household incomes between $\$ 7,000$ and $\$ 9,999$. Only $11 \%$ of the residents of the Northeast favored local sales taxes to raise needed additional local revenues - far lower than the nationwide average-though still greater than those selecting local income taxes or increases in the property tax. Nonwhites and those less than 44 years of age were also sharply less favorable to local sales taxes than the national average though still preferring a local sales tax as their second choice if added local revenues were necessary.

## THE POLLS

This report presents the findings of a personal interview research survey and two tetephome polts conducted among probability samples of over 1,000 men and women, 18 years of age or over, living in private households in the continental United States.

Interviewing for this Cayavan survey was completed during the period Sepr 49 through Oet, by members of the Opinion Research Corporation national interviewing staff. All interviews were conducted in the homes of respondents.
The most advanced probability sampling techniques were employed in the selection of interviewing households. To further ensure the representativeness of the sample, data were subject to ORC's weighting program, which takes into account probability of being at home and six different demographic variables. Therefore, the results may be projected to the total U.S. population of men and women, 18 years of age or over.

## Introduction to Detailed Findings

The tables contained in this report present
detailed findings of the various survey results. Where percentages add to more than 100 , it is because of multiple answers.

The following definitions are provided for some of the standard sidebreaks by which the data are analyzed. Other sidebreaks are self-explanatory.

Occupation refers to the occupation of the respondent. The 1981 questionnaire uses the Hollingshead classifications shown at the left below; the sidebreak collapses them as shown at the right and adds a retired classification.

The city size groups all respondents into one of three major categories - rural, suburb, or city and is based on interviewer observation of the respondent's location in terms of rural, suburb and city, and the age and type of dwelling.

City dwellers are divided into two groups those living in single family versus multi-family dwellings.

The four geographic regions are comprised as follows: Northeast - Maine, New Hampshire, Vermont, Massachusetts, Rhode Island, Connecticut, New York, New Jersey, Pennsylvania; North-

Hollingshead Classification

Higher Executives, Large Business Owners, Major Professionals

Business Manager, Medium Business
Owners, Lesser Professionals
Administrative, Small Business
Owners, Semiprofessionals
Clerical/Sales Workers, Technicians, Little Business Owners

Skilled Manual Employees
Machine Operators, Semiskilled Employees

Unskilled Employees

## Sidebreak Groupings

Retired

Central - Ohio, Indianá, Illinois, Michigan, Wisconsin, Minnesota, Iowa, Missouri, North Dakota, South Dakota, Nebraska, Kansias; South - Delaware, Maryland, District of Columbia, Virginia, West Virginia, North Carolina, South Carolina, Georgia, Florida, Kentucky, Tennessee, Alabama, Mississippi, Arkansas, Louisiana, Oklahoma, Texas; West - Montana, Idaho, Wyoming, Colorado, New Mexico, Arizona, Utah, Nevada, Washington, Oregon, California.

The Nielsen Market Size groups respondents by A.C. Nielsen Company market size:

A - All counties comprising the 25 largest metropolitan areas
B - All other counties baving a population of 150,000 or more; or that form part of a metropolitan area having a total population of 150,000 or more;
C - All other counties having a population of 35,000 or more, or forming part of a metropolitan area having a population of 35,000 or more; and
D - All remaining counties in the country. Income groups respondents by total family income in 790 , before taxes.

## APPENDIX TABLE C

## 1979-73

In Addition to Providing Certain Monies to State and Local Governments for Specific Purposes, the National Government also Gives a Form of Federal Aid Called Revenue Sharing. Under this Program, State and Local Governments Receive About $\$ 7$ Billion a Year to Use as They Think Best. Do You Favor or Oppose This Revenue Sharing Form of Federal Aid.*

## APPENDIX TABLE G

## 1580-74 <br> Here are Some of the Reasons that People Give Us for Feeling that the Property Tax is Not a Good Tax. Which One of These Do You Feel is the Most Important Reason for Dissatisfaction with the Property Tax?

(in percent)

1. It is hardest on low income families.
2. It is based on estimates of home value that are not always fair.
3. Reassessments may sometimes result in a shocking tax bill increase.
4. It discourages homeowning.
5. It taxes any increase in the value of a home over the original purchase price, even though that increase is only on paper and not in the homeowner's hands unless he sells the house.
6. Property taxes have been going up faster than other taxes.
7. No opinion.
8. Don't agree that property tax is not a good tax.

## APPENDIX TABLE H <br> March 1972 <br> Here are Three Statements About Taxes. Which of the Statements Agrees Most With Your Own Thinking? <br> (in percent)

1. The Federal government should start a value added tax (a form of national sales tax) and use the money to help reduce local property taxes.
2. The Federal government should not start a value added tax (a form of national sales tax) but should raise individual income taxes to help reduce local property taxes.
3. The Federal government should take neither of these actions to help reduce local property taxes.
4. Don't know.

## APPENDIX TABLE P

President Reagan has indicated he would like to turn a number of programs back to the state and local governments and get the federal government completely out of the financing and administration of such programs. Various leaders and organizations have proposed that the following functions be turned back. From which functions would you like to see the federal government withdraw?

1. Public Schools (kindergarten-12th grade)
2. Highways
3. Mass Transportation
4. Public Service Jobs
5. Welfare (AFDC)
6. Day Care and other Social Services
7. School Lunch and other Nutrition Programs
8. Public Hospitals and Health
9. Don't Know
Total Public
$18-29$ Years of Age
$30-44$
$45-59$
60 Years and Over

## What is ACIR

The Advisory Commission on Intergovernmental Relations (ACIR) was created by the Congress in 1959 to monitor the operation of the American federal system and to recommend improvements. ACIR is a permanent national bipartisan body representing the executive and legislative branches of Federal, state, and local government and the public.
The Commission is composed of 26 members - nine representing the Federal government, 14 representing state and local government, and three representing the public. The President appoints 20 -three private citizens and three Federal executive officials directly and four governors, three state legislators, four mayors, and three elected county officials from slates nominated by the National Governors' Conference, the Council of State Governments, the National League of Cities/U.S. Conference of Mayors, and the National Association of Counties. The three Senators are chosen by the President of the Senate and the three Congressmen by the Speaker of the House.

Each Commission member serves a two year term and may be reappointed.
As a continuing body, the Commission approaches its work by addressing itself to specific issues and problems, the resolution of which would produce improved cooperation among the levels of government and more effective functioning of the federal system. In addition to dealing with the all important functional and structural relationships among the various governments, the Commission has also extensively studied critical stresses currently being placed on traditional governmental taxing practices. One of the long range efforts of the Commission has been to seek ways to improve Federal, state, and local governmental taxing practices and policies to achieve equitable allocation of resources, increased efficiency in collection and administration, and reduced compliance burdens upon the taxpayers.
Studies undertaken by the Commission have dealt with subjects as diverse as transportation and as specific as state taxation of out-of-state depositories; as wide ranging as substate regionalism to the more specialized issue of local revenue diversification. In selecting items for the work program, the Commission considers the relative importance and urgency of the problem, its manageability from the point of view of finances and staff available to ACIR and the extent to which the Commission can make a fruitful contribution toward the solution of the problem.
After selecting specific intergovernmental issues for investigation, ACIR follows a multistep procedure that assures review and comment by representatives of all points of view, all affected levels of government, technical experts, and interested groups. The Commission then debates each issue and formulates its policy position. Commission findings and recommendations are published and draft bills and executive orders developed to assist in implementing ACIR policies.

[^0]:    ${ }^{1}$ These differences are not, however, significant in the statistical sense of the word.

[^1]:    ${ }^{2}$ Everett Carll Ladd, Jr. and Seymour Martin Lipset, "Public Opinion and Public Policy," The United States in the 1980's, Peter Duignan and Alvin Rabushka (eds), Hoover Institution, Stanford University, 1980, p. 69.

[^2]:    ${ }^{3}$ This three percentage point difference, however, falls within the range of statistical error associated with the sampling technique. Hence, this difference is close to, but not quite, statistically significant - it cannot be ruled out that the three percentage point difference is due merely to chance.

[^3]:    ${ }^{4}$ This three percentage point difference is not, however, statistically significant.

[^4]:    The reports of the Advisory Commission on Intergovernmental Relations are released in three series: the " A " series denotes reports containing Commission recommendations; the " M " series contains information reports; and the " S " series identifies reports based on public opinion surveys. All Commission reports are printed by, and available from the U.S. Government Printing Office, Washington, DC.
