The reports of the Advisory Commission on Intergovernmental Relations are released in three series: the "A" series denotes reports containing Commission recommendations; the "M" series contains information reports; and the "S" series identifies reports based on public opinion surveys. All Commission reports are printed by, and available from the U.S. Government Printing Office, Washington, D.C. 20901.

# Foreword

This publication presents the 12th annual survey of public attitudes toward government and taxes conducted for the Advisory Commission on Intergovernmental Relations (ACIR). The first 11 were conducted by the Opinion Research Corporation of Princeton, NJ, on their ORC Caravan, a national personal interview service. This year the ACIR was obliged to change pollsters when ORC decided to discontinue its personal interview surveys. ACIR staff believed that using a different survey methodology would destroy comparability with prior survey results.

The Gallup Organization was chosen competitively to conduct the 1983 survey using the Gallup Personal Omnibus. Every effort was made to ensure comparability with the previous surveys by duplicating the methods and analysis of prior years. All of our tests and checks indicate that comparability has been maintained.

This year ACIR asked nine questions, eight on government revenues and spending and one on public attitudes toward political parties and interest groups. This publication presents both the current results and the cumulative record.

Susannah E. Calkins, senior analyst in the Taxation and Finance section, prepared this study. Many members of the ACIR staff participated in developing the questions and reviewing the results. Typing assistance was provided by Ruth Phillips and Arlene Preston.

All interpretations of the data are those of the ACIR staff.

# The 1983 Survey HIGHLIGHTS

#### Sales Taxes are Favored if More Revenues are Needed

When additional tax revenues are needed, the public views higher sales taxes as the least objectionable way to collect them, according to the 12th annual poll of public opinion conducted for the Advisory Commission on Intergovernmental Relations:

- At the national level, respondents were asked to choose between higher individual income tax rates and a new national sales tax on all purchases other than food. The 52% who preferred a sales tax was more than double the 24% who endorsed an increase in income tax rates. The remaining 25% said they didn't know. (Table 3)
- At the state level, respondents were asked to choose between obtaining more state revenues from a state individual income tax or a state sales tax. Again, support for a sales tax at 57% was two and a half times the 23% preferring a state income tax. Respondents choosing "Don't know" amounted to 20%. (Table 5)
- At the local level, the range of alternatives was larger with a choice among a local income tax, the local sales tax, and a local property tax. Here, too, the clear preference was for the local sales tax with 45% choosing it, 19% choosing the local property tax, and 12% choosing a local income tax. Those choosing "Don't know" amounted to 24%. (Table 6)

vote their pocketbook interests. High levels of support for the sales tax at all levels of government came from the upper income groups; a lower-than-average level of support for sales taxes was found among lower income groups.

When compared to the results of earlier ACIR polls, the state sales tax is increasing its popularity over its major competitor, the state income tax. In 1972 and 1976, the state sales tax popularity lead was 21 and 20 percentage points respectively. In 1983, the sales tax margin over the state income tax had increased to 34 points. (Table D)

High public acceptance of the sales tax as a revenue source was borne out by responses to another 1983 question: which tax was the worst tax—that is, the least fair? (Table 2) Far more respondents (35% and 26%) chose the federal income and the local property tax as the least fair than the 13% selecting the state sales tax. (See table below.)

Over the past three years, answers to this question have been remarkably consistent with the only change being a slow decline in the percentage of those who chose the local property tax as the worst tax—from 33% in 1981 to 26% in 1983, close to the figures for 1979 and 1980.

The growing preference for sales taxes might be attributed in large part to the growing burden of payroll taxes (income taxes and social security), the perceived inequities in the present income tax, and the long-standing public resistance to more intensive use of the property tax. Support for sales taxes can also be attributed to the fact that they are paid frequently and in small amounts. Moreover, many taxpayers like the idea

As might be expected, respondents tend to

Source: Tables 3, 5, and 6.

that they can control somewhat the size of their payments by saving rather than consuming and that all citizens are paying something.

Compared to other industrial countries, the United States makes below average use of consumer-type levies. Value-added taxes are heavily relied upon by most European countries.

Growing public support for using the sales tax at all three levels of government drives another final nail into the coffin of tax separation-a now obsolete doctrine that staked out the income tax field as the predominant preserve of the federal government, the sales tax as the province of the states, and the property tax as the domain of local governments-only the latter remains true.

#### **Regional Patterns in Tax Preferences**

For the most part, interregional variations in attitudinal patterns reflect the current regional tax structure. The Northeast, which leans rather heavily on the state income tax, is well above the national average in its support for the income tax as the instrument of choice for raising additional revenue at all three levels of government. (See table above.)

#### **Reforming the Nation's Tax System**

Questions about the best options for the tax increases at the various levels of government were followed with a "reform" question-What would be the most important single change for making the nation's tax system more fair? "Make upper income taxpayers pay more" was the choice of 49%; only 13% chose "reduce taxes on lower income taxpayers"; and 6% chose "make business firms pay more, even if it reduces the number of jobs." (Table 7) The second largest percentage opted for no change: 16% chose "leave the tax system alone-it is about as fair as you are ever going to get."

Judging from the "Don't Know" responses, the American public has fewer doubts about the ills of the present tax system and how to cure them than it has about how to raise additional revenue. About 9% of the respondents replied "Don't Know" when asked to give their views on tax reform. The "Don't Know" response rate ranged between 20% and 25% when the respondents were asked which tax they would like if additional revenue had to be raised by any of the three levels of government.

Groups with above average "Don't Know" responses tended to be those with lower incomes, lower educational levels, nonwhites, and persons over 65 years of age. The large percentages of "Don't know" responses this year show a sharp increase from the 10-16% ranges found for comparable questions in 1972, 1976, and 1981. The increase may reflect growing public indifference, inability or reluctance to make judgments concerning details of an increasingly complex tax system, or the fact that public debate has not focused on the choice of a new tax instrument.

#### **Rating Governments**

In each of the 12 years the ACIR has conducted the public opinion poll (Table 1), respondents have been asked to choose the level of government from which they get the most for their money. In 1983, the federal government and local

	From Which Level of Government Do You Feel You Get the Most For Your Money—Federal, State, or Local?												
						Per	cent of	U.S. Pu	ıblic				
	N 19	lay 983	May 1982	Sept. 1981	May 1980	May 1979	May 1978	May 1977	March 1976	May 1975	April 1974	May 1973	March 1972
Federal		31	35	30	33	29	35	36	36	38	29	35	39
Local		31	28	33	26	33	26	26	25	25	28	25	26
State		20	20	25	22	22	20	20	20	20	24	18	18
Don't Know	· · · · ·	19	17	14	19	16	19	18	19	17	19	22	17

government were tied for first place at 31% each; state government received 20%, and 19% said they didn't know. (See table above.)

Since 1978, the percentages favoring federal government and local government have been flipflopping with each sector winning a plurality in alternate years; the percent choosing the federal government has ranged from 29% to 35%, while the percent choosing local government has ranged between 26% and 33%. State government, chosen by 20% of the respondents, is in its traditional third place—since 1975, with one exception, it has been chosen by 20% to 22%.

#### State Responsibility to Make up Cutbacks in Federal Financial Aid to Local Governments

Recognizing the ongoing debate about federal cutbacks in financial aid to local government, the 1983 ACIR poll asked for respondents' views on whether states should try to "make up" almost all, some, or none of the cutbacks. Forty-six percent of the respondents believed that state governments should try to make up "only some of the federal cutbacks in financial aid to local government." Higher income groups, those with some college and college graduates, and professional-managerial workers gave high levels of support (57% to 62%) to this view. The percentages choosing not to make up any of the cutbacks, and to make up almost all were about the same (16% and 18%), and 20% chose the "Don't Know" alternative. (Table 8)

On tough issues, most Americans often tend to avoid either extreme position and to gravitate towards the middle course. Responses to the cutback question clearly reflect that middle-of-theroad tendency.

#### **Attitudes Toward Political Representation**

In 1983, the ACIR launched a study of how changes in the political party system affect federalism. To measure the extent of erosion of public support for the two major political parties, a new question was asked to determine whether citizens felt their interests were best represented by organized special interest groups (business, labor, environmental and civil rights groups) or by the two major political parties. Organized groups were chosen by 45%, and the two major political parties by 34%. Other political parties were selected by 3% of the sample, and 17% of the respondents said they didn't know. (Table 9)

Analysis of the responses indicates that as age increases, identification with the two major political parties increases: 41% of the over 35 age group chose the major political parties compared to the national total of 34%; only 25% of those under 35 chose the two major political parties. As education increases, identification with the two major political parties remains relatively constant (ranging between 32% and 39%), but the percentage choosing organized interest groups increases from 34% for those not completing high school to 57% for the college graduates. As income increases, the percentage of respondents choosing political parties increases-from 29% for the under \$15,000 group to 44% for the \$40,000 and over group.

Regional differences are also noteworthy with 52% of the Northeast region's residents choosing interest groups, considerably more than the 41% choosing them in the South and 43% in the North Central region. The two major political parties were chosen by 26% of the respondents in the Northeast, but by percentages ranging from 35% to 38% in the other three regions.

# THE POLL

This report presents the findings of a personal interview research survey conducted among a probability sample of 1,517 men and women, 18 years of age or over, living in private households in the United States.

Interviewing for this survey was completed from April 29 through May 2, 1983, by members of the Gallup Personal Omnibus national interviewing staff. All interviews were conducted in the homes of respondents.

To ensure the representativeness of the sample, data were weighted to take into account demographic variables. Therefore, the results may be projected to the total adult civilian population, 18 years of age or over, living in the United States.

#### **Introduction to Detailed Findings**

The tables contained in this report present detailed findings of the various survey results. Percentages may not add to 100 because of rounding.

The following definitions are provided for some of the standard breakdowns by which the data are analyzed. Other breakdowns are selfexplanatory.

Occupation refers to the occupation of the respondent. The types of positions included in each category are listed below. The fourth classification is retired persons.

Professional/Manager/Owner

Executives, Professionals, Technical and Kindred Workers, Managers, Officials, and Proprietors.

White Collar, Sales, Clerical

Clerical, Office and Secretarial Workers, and Sales Agents and Workers.

Blue Collar

Semi-skilled, Laborers, and Service workers: Craftsmen, Foremen, Kindred Workers, Maintenance Repairmen, Carpenters, Plumbers and Electricians; Operatives and Kindred Workers, Apprentices, and Assembly Line Workers; Housekeepers in Private Household, Institutional and Public; Police, Security Guards; Beauticians and Barbers.

Metro size groupings are determined by the U.S. Bureau of the Census population figures for the metropolitan area. Nonmetro areas are those not in a metropolitan area, with populations under 50,000. Central city areas have populations of 50,000 or more in a central city of a metropolitan area. Fringe areas have populations of 50,000 or more in metropolitan areas outside a central city.

The four geographic regions are defined as follows: Northeast—Maine, New Hampshire, Vermont, Massachusetts, Rhode Island, Connecticut, New York, New Jersey, Pennsylvania; North Central—Ohio, Indiana, Illinois, Michigan, Wisconsin, Minnesota, Iowa, Missouri, North Dakota, South Dakota, Nebraska, Kansas; South— Delaware, Maryland, District of Columbia, Virginia, West Virginia, North Carolina, South Carolina, Georgia, Florida, Kentucky, Tennessee, Alabama, Mississippi, Arkansas, Louisiana, Oklahoma, Texas; West—Montana, Idaho, Wyoming, Colorado, New Mexico, Arizona, Utah, Nevada, Washington, Oregon, California, Hawaii, Alaska.

Income groups respondents by 1983 total household income before taxes.

Sampling tolerances for the survey are  $\pm 3$  percentage points at the 95% level of confidence.

*Further detail* on the survey methods and sampling tolerances are available from ACIR.

#### **Previous Classifications**

Data for 1972-81 are presented in the Appendix Tables, Detailed Results of 1981-72 Surveys (p. 29). Descriptions of classifications used in these years may be found in the volumes for the relevant years.

Because major classification changes were made in 1982, tables for 1982 and 1983 are presented separately; they appear on the following pages.

# If the Federal Income Tax Collections Must Be Increased, Which Way Is the Best?

#### (in percent)

1. Raise individual income tax rates

 Cut back on current tax exemptions such as social security, pensions, interest on municipal bonds, etc.
 Cut back on all itemized deductions, such as those for state and local taxes, interest paid on mortgates and consumer loans, and charitable contributions

4. Don't know

About Government Power Today?	

(in percent)

 Federal government has too much power.
 Federal government is using about the right amount of power for meeting today's needs.
 Federal government should use its powers more vigorously to promote the well being of all segments of the people.

Federal grant programs to state and local governments can serve a number of different national goals. But, when the federal budget is tight, it is necessary to make choices among them. Please rate each of these Federal aid programs. If you believe the program is totally unnecessary, you would give it a minus 5; if you believe the program is totally necessary, you would give it a plus 5. You may pick ratings in between the minus 5 and the plus 5. If you have no opinion, or don't know, use the "zero."

#### 1. Federal grant programs that provide special assistance to poor states — that is, states which are below average in ability to raise revenues. (in percent)

Federal grant programs to state and local governments can serve a number of different national goals. But, when the federal budget is tight, it is necessary to make choices among them. Please rate each of these Federal aid programs. If you believe the program is totally unnecessary, you would give it a minus 5; if you believe the program is totally necessary, you would give it a plus 5. You may pick ratings in between the minus 5 and the plus 5. If you have no opinion, or don't know, use the "zero."

3. Federal grant programs assisting all state and local governments in providing aid to poor people.

1979-73

Specific Purposes, the National Government also Gives a Form of Federal Aid Called Revenue Sharing. Under this Program, State and Local Governments Receive About \$7 Billion a Year to Use as They Think Best. Do You Favor or Oppose In Addition to Providing Certain Monies to State and Local Governments for This Revenue Sharing Form of Federal Aid.\*

#### APPENDIX TABLE G

1**980 -** 74

Here are Some of the Reasons that People Give Us for Feeling that the Property Tax is Not a Good Tax. Which One of These Do You Feel is the Most Important Reason for Dissatisfaction with the Property Tax?

#### (in percent)

1. It is hardest on low income families.

2. It is based on estimates of home value that are not always fair.

3. Reassessments may sometimes result in a shocking tax bill increase.

4. It discourages homeowning.

5. It taxes any increase in the value of a home over the original purchase price, even though that increase is only on paper and not in the homeowner's hands unless he sells the house.

6. Property taxes have been going up faster than other taxes.

7. No opinion.

8. Don't agree that property tax is not a good tax.

#### APPENDIX TABLE H March 1972 Here are Three Statements About Taxes. Which of the Statements Agrees Most With Your Own Thinking? (in percent) 1. The Federal government should start a value added tax (a form of national sales tax) and use the money to help reduce local property taxes. 2. The Federal government should not start a value added tax (a form of national sales tax) but should raise individual income taxes to help reduce local property taxes. 3. The Federal government should take neither of these actions to help reduce local property taxes. 4. Don't know. March 1972 2. 1. 3. 4. #### APPENDIX TABLE L

#### MAY 1978

#### Which of These Statements Comes Closest to Your View **About Government Power Today?**

(in percent)

Federal government has too much power.
 Federal government is using about the right amount of power for meeting today's needs.
 Federal government should use its powers more vigorously to promote the well being of all segments of the people.

4. No Opinion.

# Which of These Three Statements About the Ability of State and Local Governments to Deal with Today's Problems Comes Closest to Your View?

#### (in percent)

1. State and local government is too fragmented and disorganized to be effective

2. State and local government does an adequate job in dealing with today's problems

3. State and local government should be given more authority because it is closest to the people

4. No Opinion

# What is ACIR?

The Advisory Commission on Intergovernmental Relations (ACIR) was created by the Congress in 1959 to monitor the operation of the American federal system and to recommend improvements. ACIR is a permanent national bipartisan body representing the executive and legislative branches of Federal, state, and local government and the public.

The Commission is composed of 26 members nine representing the Federal government, 14 representing state and local government, and three representing the public. The President appoints 20—three private citizens and three Federal executive officials directly and four governors, three state legislators, four mayors, and three elected county officials from slates nominated by the National Governors' Association, the National Conference of State Legislatures, the National League of Cities/U.S. Conference of Mayors, and the National Association of Counties. The three Senators are chosen by the President of the Senate and the three Congressmen by the Speaker of the House.

Each Commission member serves a two year term and may be reappointed.

As a continuing body, the Commission approaches its work by addressing itself to specific issues and problems, the resolution of which would produce improved cooperation among the levels of government and more effective functioning of the federal system. In addition to dealing with the all important functional and structural relationships among the various governments, the Commission has also extensively studied critical stresses currently being placed on traditional governmental taxing practices. One of the long range efforts of the Commission has been to seek ways to improve Federal, state, and local governmental taxing practices and policies to achieve equitable allocation of resources, increased efficiency in collection and administration, and reduced compliance burdens upon the taxpayers.

Studies undertaken by the Commission have dealt with subjects as diverse as transportation and as specific as state taxation of out-of-state depositories; as wide ranging as substate regionalism to the more specialized issue of local revenue diversification. In selecting items for the work program, the Commission considers the relative importance and urgency of the problem, its manageability from the point of view of finances and staff available to ACIR and the extent to which the Commission can make a fruitful contribution toward the solution of the problem.

After selecting specific intergovernmental issues for investigation, ACIR follows a multistep procedure that assures review and comment by representatives of all points of view, all affected levels of government, technical experts, and interested groups. The Commission then debates each issue and formulates its policy position. Commission findings and recommendations are published and draft bills and executive orders developed to assist in implementing ACIR policies.
