## A COMMISSION SURVEY

Advisory Commission on Intergovernmental Relations WASHINGTON, D.C. 205751984

## Foreword

This publication presents the 13th annual survey of public attitudes toward government and taxes conducted for the Advisory Commission on Intergovernmental Relations (ACIR).

The Gallup Organization has conducted the 1983 and 1984 surveys using the Gallup Personal Omnibus. Every effort was made to ensure comparability with the previous surveys conducted by Opinion Research Corporation of Princeton, New Jersey.

This year ACIR asked seven questions. This publication presents both the current results and the cumulative record. It contains a new appendix which lists all the questions which have been asked since 1972 and the tables in which detailed data on responses can be found.

Susannah E. Calkins, senior analyst in taxation and finance, prepared this study with the assistance of Emmeline Rocha. Many members of the ACIR staff participated in developing the questions and in reviewing the results. Typing assistance was provided by Ruth Phillips.

All interpretations of the data are those of the ACIR staff.

# The 1984 Survey HIGHLIGHTS 

## Local Governments Give the Most for Taxpayers' Money

For the first time in the 13 years that the ACIR has conducted its public opinion poll, the federal government, usually a front runner, placed third when respondents were asked, "From which level of government do you feel you get the most for your money-federal, state, or local?'" Only $24 \%$ chose the federal government; $35 \%$ picked local government and $27 \%$ selected state government. (Table 1) Local and state governments hit 13-year highs, while the $24 \%$ choosing the federal government fell considerably from $31 \%$ in 1983 and from previous lows of $29 \%$ in 1979 and 1974.

In a period of high and continuing federal deficits, part of the sharp decline in public support for the national government might be attributed to recent publicity highlighting wasteful spending, such as that reported by the Grace Commission. Increasing public support for state and local governments may also reflect public perceptions that states and local governments are doing far better jobs of getting their fiscal houses in order than has the national government. As massive federal deficits mounted, states and localities appeared to be doing whatever it took to avoid deficits during the severe $1982-83$ recession, including cutting back spending and raising taxes.

Increased public support for local and state governments indicates that the Reagan Admin-

istration may be achieving some of its "New Federalism" goals-instead of citizens turning to Washington to solve their problems, they are more likely to turn to their local and state governments.
Among the groups tending to give aboveaverage support to the national government are lower-income groups, the elderly, and nonwhites. Although nonwhite support, at $33 \%$, is 10 percentage points above white support, it represents a sharp drop in the nonwhite percentage of support for the national government since 1982 when it was $57 \%$. In contrast, the percentage of nonwhites choosing state governments as giving the most for their money has doubled since 1982 -from $13 \%$ to $26 \%$-and the percentage choosing local governments rose from $19 \%$ in 1982 to $24 \%$ in 1984.

The proportion of respondents supporting the national government drops as income increasesfrom $29 \%$ for those with household incomes less than $\$ 15,000$ a year to $18 \%$ for those earning more than $\$ 40,000$. Conversely, support for local government moves in the opposite direction, increasing as income increases-from $29 \%$ of those with income less than $\$ 15,000$ a year to $43 \%$ for those with more than $\$ 40,000$ in annual income.

## Preferences in Types of Taxes

The federal income tax was chosen as the worst tax-that is, the least fair-for the sixth straight year. It leads with $36 \%$ of the votes. This widespread disenchantment with the income tax might be explained in part by the fact that in-
flation has pushed millions of middle-income taxpayers into tax brackets that heretofore had been occupied only by the wealthy. (Table 2)

Regional response patterns show sharp differences in fiscal preferences, with respondents' preferences reflecting the economic, social and fiscal make-up of their region.

- In the more liberal Northeast, $24 \%$ of the respondents chose the state sales tax as the least fair, compared to a national average of $15 \%$. The Northeast has traditionally preferred income taxes which are considered less regressive.
- In the West, only $20 \%$ of the respondents chose the local property tax as the least fair, sharply down from peak levels of about $45 \%$ in 1977 and 1978 before Proposition 13-type tax limitations swept that region. Such a sharp decrease undoubtedly reflects the success of the tax limitation movement in the West.
- In the fiscally conservative West, $44 \%$ of the respondents selected the federal income tax as the least fair, compared to a national average of $36 \%$.
- In the North Central region, $39 \%$ of the respondents chose the local property tax as the least fair compared to a national average of $29 \%$. The high level of dissatisfaction with the local property tax in the North Central region probably stems from the high local property tax burdens in that area and from the fact that these burdens were accentuated by how severely the 1982-83 recession hit that region.

Table 3
In the next fiscal year, the federal government is expected to spend about 180 billion dollars more than it takes in. Which one of these basic ways of reducing the deficit would you most prefer?

|  | Percent <br> of U.S. <br> Public |
| :--- | :---: |
|  | 51 |
| 1. Mostly by cuts in spending. | 7 |
| 2. Mostly by increases in taxes which would be earmarked for reducing the deficit. | 33 |
| 3. About equally by cuts in spending and by tax increases. | 9 |
| 4. Don't know/No answer. |  |

Detailed data appear in Appendix II, Table 3, p. 17.

## Reducing the Federal Deficit

Spending Cuts Vs. Tax Hikes. The ACIR poll also posed three questions relating to the current federal deficit. The first question asked whether respondents preferred cuts in spending, increases in taxes, or equal cuts in spending and tax increases as ways to reduce the deficit. A majority- $51 \%$-of the respondents chose "mostly by cuts in spending," while $33 \%$ chose "about equally by cuts in spending and by tax increases," and only 7\% opted for "mostly by increases in taxes earmarked for reducing the deficit." (Table 3)

Support for reducing the deficit by cuts in spending (51\%) was fairly uniform across demographic groups (except for nonwhites at $38 \%$ ). Relatively strong support ( $40 \%$ or more) for the even-handed approach for equal cuts in spending and tax hikes was concentrated in the college graduate group, those with annual incomes over $\$ 40,000$, the professional and managerial group, and retired persons.

Spending Cut Choices. The poll then probed respondents' preferences regarding types of expenditure cuts. Respondents were given an opportunity to choose which type of spending program they would prefer to cut. (Table 4)

Table 4

## If the federal government decides to reduce spending to keep it more in line with revenues, which one of these would you prefer?

1. Cut defense spending.
2. Cut social security and Medicare.
3. Cut all federal programs other than defense and Social Security and Medicare. That would include federal programs such as farm supports, veterans benefits, welfare, education, and transportation aid.
4. All federal programs.
5. No federal programs. ..... $2^{1}$
6. Don't know/No answer. ..... 12
${ }^{1}$ Responses were volunteered.
Detailed data appear in Appendix II, Table 4, p. 18.

## Table 5

## Suppose the federal government must raise taxes substantially, which of these do you think would be the best way to do it?

|  | Percent of U.S. Public |  |
| :---: | :---: | :---: |
|  | 1984 | 1972 |
| 1. Have a form of national sales tax on things other than food and similar necessities. | 32 | 34 |
| 2. Raise individual income tax rates. | 7 | 10 |
| 3. Raise money by reducing special tax treatment for capital gains and cutting tax deduction allowances for charitable contributions, state and local taxes, medical expenses, etc. | 47 | 40 |
| 4. Don't know/No answer. | 14 | 16 |

Detailed data appear in Appendix II, Table 5, p. 19.

Support for cuts in defense spending was particularly strong among nonwhites ( $68 \%$ as compared with the national average of $50 \%$ ). As household income rose, support for defense cuts dropped (from $55 \%$ of those with less than $\$ 15,000$ of annual income to $43 \%$ of those with annual incomes of over $\$ 40,000$ ). Conversely, as income rose, support for cutting all programs other than defense and Social Security and Medicare tended to increase.

Tax Hike Choices. A second follow-up question gave the respondents an opportunity to choose the best way for the national government to raise taxes substantially. This question was similar to one asked in the ACIR's 1972 poll. In 1984, 47\% chose "raise money by reducing special tax treatment for capital gains and cutting tax deduction allowances for charitable contributions, state and local taxes, medical expenses, etc." This level was seven percentage points over the $40 \%$ who chose this option in 1972, undoubtedly reflecting increased public concern about tax deductions and "loopholes." The national sales tax alternative was chosen by $32 \%$ (about the same as in 1972) and only $7 \%$ chose "raise individual income tax rates." (Table 5)

Regional Preferences in Deficit Reduction. Questions posed concerning federal deficit reduction indicated sharp differences in responses between the Northeast and other regions. When asked about federal cuts in spending, only $22 \%$ of
the respondents in the Northeast selected cuts in "all federal spending other than defense and Social Security and Medicare," compared with $36 \%$ of the respondents in the West and North Central regions and $29 \%$ in the South. The Northeast's greater concern for maintaining federal domestic programs probably stems from the fact that this region, with its many older urban centers, could be hard hit by sharp cuts in federal aid for welfare, education and transportation.

The Northeast's distinctiveness is also reflected in choices among alternative ways to raise federal revenues. A proposed national sales tax has fewer supporters in the Northeast than in any other region of the country. Support for a national sales tax ranged from $24 \%$ in the Northeast to $36 \%$ in the West. However, there were a large number of "Don't Knows" (20\%) among the Northeastern respondents. All four regions indicated a somewhat similar preference for reductions in special tax treatment of capital gains and deduction of state and local taxes. Between $45 \%$ and $49 \%$ of respondents in each region selected these "base broadeners" as the best way for the federal government to raise taxes substantially.

## Rating Government Power

In 1978, 1982, and again in 1984, the poll probed public attitudes toward the amount of power possessed by the federal government. (Table 6) Be-

## Table 6

## Which of these statements comes closest to your view about government power today?

|  | Percent of U.S. Public |  |  |
| :--- | ---: | ---: | ---: |
|  | 1984 | 1982 | 1978 |
| The federal government |  |  |  |
| 1. Has too much power. | 35 | 38 | 38 |
| 2. Has about the right amount of power. | 25 | 18 | 18 |
| 3. Should use its powers more vigorously. | 34 | 30 | 36 |
| 4. No opinion. | 6 | 14 | 8 |

Detailed data appear in Appendix II, Table 7, p. 21; Appendix III, Table M, p. 64.
tween 1978 and 1982, there was no change in the percent (38) believing that the national government has too much power or in the percent (18) believing that it has about the right amount of power. The percent believing that the national government should use its powers more vigorously dropped from $36 \%$ in 1978 to $30 \%$ in 1982. In 1984, this trend reversed and there was a significant increase of seven percentage points in the percent believing that the government has about the right amount of power, and a smaller increase (four percentage points) in those believing the national government should use its powers more vigorously.

The 1982 report on public opinion (S-11) commented on the sharp polarization between whites and nonwhites reflected in responses to the question on federal government power; in 1984, this polarization is not nearly as great. In 1982, there was a 20 percentage point difference between whites and nonwhites on this issue of whether
the federal government has too much power. In 1984, the difference is only seven percentage points. (Table 7) There has also been a significant closing of the gap between the percentages of whites and nonwhites believing that the federal government should use its power more vigorously.
In its attitudes concerning federal government power, the Northeast continued its distinctive stance: $44 \%$ in the Northeast believed that the national government should use its powers more vigorously, compared to $30 \%$ to $32 \%$ in the other regions. Only $26 \%$ in the Northeast felt that the national government has too much power, compared to $36 \%$ to $39 \%$ for the other regions.

## Use of State Surpluses

As the economy has improved, many state treasuries are beginning to reveal surpluses. The poll asked respondents what states should do with most of these surplus funds and gave them three

Table 7
White and Nonwhite Views on Federal Government Power

|  | Percent of U.S. Public |  |  |  |
| :---: | :---: | :---: | :---: | :---: |
|  | 1984 |  | 1982 |  |
|  | Whites | Nonwhites | Whites | Nonwhites |
| The federal government |  |  |  |  |
| 1. Has too much power. | 36 | 29 | 41 | 21 |
| 2. Has about the right amount of power. | 25 | 20 | 18 | 15 |
| 3. Should use its powers more vigorously. | 33 | 41 | 28 | 45 |
| 4. No opinion. | 6 | 10 | 13 | 19 |
| Detailed data appear in Appendix II, Table 7, p. 21. |  |  |  |  |

choices-reducing taxes, expanding government programs, or placing the money in a "rainy day fund" to be used when the state's tax revenues may be reduced by a recession. A plurality of $42 \%$ chose the option of reducing taxes; only $15 \%$ chose the option of using surplus funds to expand government programs; $34 \%$ chose placing surplus funds in a "rainy day fund." "Rainy day" or economic stabilization funds are becoming popular; 22 states have them at present. Public support for "rainy day" funds reflects in part the success these funds had in mitigating the adverse impacts of the 1982-83 national recession. (Appendix II, Table 6, p. 20.)

Regions. Once again, the Northeast stands out among the regions. A significant $22 \%$ of the respondents in the Northeast opted for expanding government programs with state surplus funds. In contrast, only $13 \%$ of respondents in the South and North Central regions selected this option. The Northeast, torn by a shrinking tax base on the one hand and an ever-increasing demand for services on the other, is hard pressed to meet service
expectations. Hence, its residents are less likely to oppose expanding government programs if funds become available. Moreover, the Northeast has always favored more generous public programs than other regions. The Northeast also showed a sharp divergence from the three other regions in voting for rainy day funds: $25 \%$ in the Northeast chose the "rainy day fund" option, while all three other regions displayed preferences of between $35 \%$ and $38 \%$ for this option. (Appendix II, Table 6, p. 20.)

## Results of Previous Polls

This volume contains detailed tables presenting the results of all of the ACIR polls (1972-84). Appendix I contains a list of the questions asked since the first poll in 1972 and identifies the table in which the responses are tabulated. Appendix 11 contains tables with survey results for 1982, 1983, and 1984. Because major classification changes were made in 1982, data for the earlier years, 1972-81, are presented separately in Appendix III.

## THE POLL

This report presents the findings of a personal interview research survey conducted among a nationally representative sample of 1,516 men and women, 18 years of age or over, living in private households in the United States.

Interviewing for this survey was completed from May $18-24,1984$, by members of the Gallup Personal Omnibus national interviewing staff. All interviews were conducted in the homes of respondents.

To ensure the representativeness of the sample, data were weighted to take into account demographic variables. Therefore, the results may be projected to the total adult civilian population, 18 years of age or over, living in the United States.

## Introduction to Detailed Findings

The tables contained in this report present detailed findings of the various survey results. Percentages may not add to 100 because of rounding.
The following definitions are provided for some of the standard breakdowns by which the data are analyzed. Other breakdowns are self-explanatory.

Occupation refers to the occupation of the respondent. The types of positions included in each category are listed below. The fourth classification is retired persons.

## Professional/Manager/Owner

Executives, Professionals, Technical and Kindred Workers, Managers, Officials, and Proprietors.
White Collar, Sales, Clerical
Clerical, Office and Secretarial Workers, and Sales Agents and Workers.
Blue Collar
Semi-skilled, laborers, and service work-
ers: Craftsmen, Foremen, Kindred Workers, Maintenance Repairmen, Carpenters, Plumbers and Electricians; Operatives and Kindred Workers, Apprentices, and As-
sembly Line Workers; Housekeepers in Private Households, Institutional and Public; Police, Security Guards; Beauticians and Barbers.
Metro size groupings are determined by the U.S. Bureau of the Census population figures for the metropolitan area. Nonmetro areas are those not in a metropolitan area, with populations under 50,000 . Central city areas have populations of 50,000 or more in a central city of a metropolitan area. Fringe areas have populations of 50,000 or more in metropolitan areas outside a central city.

The four geographic regions are defined as follows: Northeast-Maine, New Hampshire, Vermont, Massachusetts, Rhode Island, Connecticut, New York, New Jersey, Pennsylvania; North Central-Ohio, Indiana, Illinois, Michigan, Wisconsin, Minnesota, lowa, Missouri, North Dakota, South Dakota, Nebraska, Kansas; SouthDelaware, Maryland, District of Columbia, Virginia, West Virginia, North Carolina, South Carolina, Georgia, Florida, Kentucky, Tennessee, Alabama, Mississippi, Arkansas, Louisiana, Oklahoma, Texas; West-Montana, Idaho, Wyoming, Colorado, New Mexico, Arizona, Utah, Nevada, Washington, Oregon, California, Hawaii, Alaska.
Income groups respondents by 1984 total household income before taxes.
Sampling tolerances for the survey are $\pm 3$ percentage points at the $95 \%$ level of confidence.

Further detail on the survey methods and sampling tolerances are available from ACIR .

## Previous Classifications

Data for 1972-81 are presented in the Appendix III, Detailed Results of 1972-81 Surveys (p. 41). Descriptions of classifications used in these years may be found in the volumes for the relevant years.
Because major classification changes were made in 1982, tables for 1982-1984 are presented separately; they appear in Appendix II.

## APPENDIX I <br> QUESTIONS ASKED: 1972-84

## QUESTIONS, 1972-84

Numbered Tables (1982-84) appear in Appendix II, Detailed Results: 1982-84 Surveys; Lettered Tables (1972-81) appear in Appendix III, Detailed Results: 1972-81 Surveys.

| Taxes | Year | Table | Page |
| :---: | :---: | :---: | :---: |

## In the next fiscal year, the federal government is expected to spend about 180 billion dollars more than it takes in. Which one of these basic ways of reducing the deficit would you most prefer?

(in percent)

1. Mostly by cuts in spending.
2. Mostly by increases in taxes which would be earmarked for reducing the deficit.
3. About equally by cuts in spending and by tax increases.
4. Don't know/No answer.

If the Federal government decides to reduce spending to keep it more in line with revenues, which one of these would you prefer?
(in percent)

1. Cut defense spending.
2. Cut social security and Medicare.
3. Cut all federal programs other than defense and social security and Medicare. That would include federal programs such as farm supports, veterans benefits, welfare, education, and transportation aid.
4. All federal programs (volunteered).
5. No federal programs (volunteered).
6. Don't know/No answer.

## Which One of the Changes Would Be the Single Most Important Change That Would Make the Nation's Tax System More Fair?

(in percent)

1. Make the upper income taxpayers pay more
2. Reduce taxes on lower income taxpayers
3. Make business firms pay more even if it reduces the number of jobs
4. Leave the tax system alone-it is about as fair as you are ever going to get

In Addition to Providing Certain Monies to State and Local Governments for Specific Purposes, the National Government also Gives a Form of Federal Aid Called Revenue Sharing. Under this Program, State and Local Governments Receive About $\$ 7$ Billion a Year to Use as They Think Best. Do You Favor or Oppose This Revenue Sharing Form of Federal Aid.*

## APPENDIX TABLE G <br> 1974, 1980

Here are Some of the Reasons that People Give Us for Feeling that the Property Tax is Not a Good Tax. Which One of These Do You Feel is the Most Important Reason for Dissatisfaction with the Property Tax?

## (in percent)

1. It is hardest on low income families.
2. It is based on estimates of home value that are not always fair.
3. Reassessments may sometimes result in a shocking tax bill increase.
4. It discourages homeowning.
5. It taxes any increase in the value of a home over the original purchase price, even though that increase is only on paper and not in the homeowner's hands unless he sells the house.
6. Property taxes have been going up faster than other taxes.
7. No opinion.
8. Don't agree that property tax is not a good tax.

## APPENDIX TABLE I <br> March 1972 <br> Here are Three Statements About Taxes. Which of the Statements Agrees Most With Your Own Thinking?

(in percent)

1. The Federal government should start a value added tax (a form of national sales tax) and use the money to help reduce local property taxes.
2. The Federal government should not start a value added tax (a form of national sales tax) but should raise individual income taxes to help reduce local property taxes.
3. The Federal government should take neither of these actions to help reduce local property taxes.
4. Don't know.

## A. Suppose the Federal Government Must Raise Taxes Substantially, Which of These do You Think Would be the Best Way to Do It?

1. Collect a value added tax (VAT), a form of national sales tax on things other than food and similar necessities.
2. Raise individual income tax rates.
3. Raise money by reducing special tax treatment for capital gains and cutting tax deduction allowances for charitable contributions, state and local taxes, medical expenses, etc.
4. Don't know.

APPENDIX TABLE P
1981
President Reagan has indicated he would like to turn a number of programs back to the state and local governments and get the federal government completely out of the financing and administration of such programs. Various leaders and organizations have proposed that the following functions be turned back. From which functions would you like to see the federal government withdraw?

1. Public Schools (kindergarten-12th grade)
2. High ways
3. Mass Transportation
4. Public Service Jobs
5. Welfare (AFDC)
6. Day Care and other Social Services
7. School Lunch and other Nutrition Programs
8. Public Hospitals and Health
9. Don't Know

Joseph P. Riley, Jr., Charleston, S.C.
Vacancy

## State Legislators

Ross O. Doyen, President, Kansas State Senate David E. Nething, Majority Leader, North Dakota State Senate William F. Passannante, Speaker Pro Tem, New York State Assembly

Elected County Officials
Gilbert Barrett, Chairman of the Board, Dougherty County, Georgia William J. Murphy, County Executive, Rensselaer County, New York Sandra Smoley, Board of Supervisors, Sacramento County, California

## What is ACIR?

The Advisory Commission on Intergovernmental Relations (ACIR) was created by the Congress in 1959 to monitor the operation of the American federal system and to recommend improvements. ACIR is a permanent national bipartisan body representing the executive and legislative branches of Federal, state, and local government and the public.

The Commission is composed of 26 membersnine representing the Federal government, 14 representing state and local government, and three representing the public. The President appoints 20-three private citizens and three Federal executive officials directly and four governors, three state legislators, four mayors, and three elected county officials from slates nominated by the National Governors' Association, the National Conference of State Legislatures, the National League of Cities/U.S. Conference of Mayors, and the National Association of Counties. The three Senators are chosen by the President of the Senate and the three Congressmen by the Speaker of the House.
Each Commission member serves a two year term and may be reappointed.
As a continuing body, the Commission approaches its work by addressing itself to specific issues and problems, the resolution of which would produce improved cooperation among the levels of government and more .effective functioning of the federal system. In addition to dealing with the all important functional and structural relationships among the various governments, the Commission has also extensively studied critical stresses currently being placed on traditional governmental taxing practices. One of the long range efforts of the Commission has been to seek ways to improve Federal, state, and local governmental taxing practices and policies to achieve equitable allocation of resources, increased efficiency in collection and administration, and reduced compliance burdens upon the taxpayers.

Studies undertaken by the Commission have dealt with subjects as diverse as transportation and as specific as state taxation of out-of-state depositories; as wide ranging as substate regionalism to the more specialized issue of local revenue diversification. In selecting items for the work program, the Commission considers the relative importance and urgency of the problem, its manageability from the point of view of finances and staff available to ACIR and the extent to which the Commission can make a fruitful contribution toward the solution of the problem.
After selecting specific intergovernmental issues for investigation, ACIR follows a multistep procedure that assures review and comment by representatives of all points of view, all affected levels of government, technical experts, and interested groups. The Commission then debates each issue and formulates its policy position. Commission findings and recommendations are published and draft bills and executive orders developed to assist in implementing ACIR policies.

[^0]:    The reports of the Advisory Commisson on Intergovernmental Relations are released in three series: the " A " series denotes reports containing Commission recommendations; the " M " series contains information reports, and the " S " series identifies reports based on public opinion surveys. All Commission reports are printed by, and available from the U.S. Government Printing Office, Washington, D.C. 20901.
