ELECTED COUNTY OFFICIALS
John H. Brewer, Kent County, Michigan
William E. Dunn, Commissioner, Salt Lake County, Utah
Conrad M. Fowler, Shelby County, Alabama

## 1976

# FOREWORD 

As part of its continuing research on fiscal federalism, the Advisory Commission on Intergovernmental Relations believes it is useful to determine public attitudes on major intergovernmental fiscal issues. Each year since 1972, the Commission has contracted with Opinion Research Corporation of Princeton, New Jersey, to gauge public opinion as to tax instruments, Federal aid, and effectiveness of the levels of government. This publication presents both the current and cumulative record of these surveys.

This study was prepared by Will Myers, senior analyst, and John Shannon, assistant director, of the Commission's public finance staff. All interpretations of the data are those of the Commission's staff.

Robert E. Merriam

Suppose the Federal government must raise taxes substantially, which of these do you think would be the best way to do it? Which do you think would be the next best way? (1972) ..... 26

## The 1976 Survey

## Summary of Findings

Five major findings emerge from the 1976 ACIR Public Opinion Survey on governmental performance, taxes, and Federal aid.

- For the fifth year in a row, the Federal government scored first, local government second, and state governments third in response to the question "From which level of government do you feel you get the most for your money?" The Federal government continued to hold its relatively strong popular lead-the alleged "antiWashington" sentiment to the contrary notwithstanding.
- The public does not appear to be quite as negative on the issue of government spending and taxes as it was at the time of the 1975 poll. Perhaps due to improved economic conditions, the number of respondents who favored a cut in government spending and taxes fell from $38 \%$ to $30 \%$, while those supporting a "hold the line ${ }^{\prime \prime}$ policy rose from $45 \%$ to $51 \%$. As in the case of last year, however, only $5 \%$ of the body politic opted in favor of in-
creased government services and higher taxes.
- If a state government must raise taxes substantially - a sales tax increase commanded far more public support than an income tax hike. A property tax increase ranked a very poor third.
- The Federal general revenue sharing program continued to enjoy clear majority support among the American publicthree out of every five respondents favored this program. About one in five respondents opposed the program and another one in five expressed no opinion.
- The public is of two minds when asked whether it favors special Federal aid for central cities in financial difficulty - $48 \%$ of the respondents were favorably disposed while $40 \%$ opposed such special help. As might be expected, there was a sharp division of opinion on the merits of this proposal. Those favoring special Federal aid to the central cities ranged from $72 \%$ of the apartment dwellers to only $33 \%$ of the rural respondents.

## The Most Popular Level of Government

| Table 1 |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
| From Which Level of Government Do You Feel You Get the Most for Your Money - Federal, State, or Local? |  |  |  |  |  |
| Percent of Total U.S. Public |  |  |  |  |  |
|  | March 1976 | May $1975$ | $\begin{aligned} & \text { April } \\ & 1974 \end{aligned}$ | May $1973$ | March $1972$ |
| Federal | 36\% | 38\% | 29\% | 35\% | 39\% |
| Local | 25 | 25 | 28 | 25 | 26 |
| State | 20 | 20 | 24 | 18 | 18 |
| Don't Know | 19 | 17 | 19 | 22 | 17 |

This five-year record reveals a remarkable consistency - the Federal government the clear public opinion winner with local governments in a relatively strong second place position (Table 1). Only during the Watergate era (April 1974 poll) was there a substantial drop in popular support for the Federal government.

A more detailed analysis of the 1976 intergov-
ernmental popularity contest reveals a cleavage of opinion along socio-economic lines (Table 1A). The Federal government drew its heaviest support from low-income families, city apartment dwellers, the non-whites, the elderly, and the least educated. In sharp contrast, local government drew its heaviest support from the college educated, the high-income families, and the managerial and professional occupations.

## The Proper Size of Government

## Table 2

Considering all government services on the one hand and taxes on the other, which of the following statements comes closest to your view?

## Percent of Total

 U.S. PublicMarch May

| Keep taxes and services <br> about where they are. | $\mathbf{1 9 7 6}$ | $\mathbf{1 9 7 5}$ |
| :--- | :---: | :---: |
| Decrease services <br> and taxes. | $51 \%$ | $45 \%$ |
| Increase services <br> and raise taxes. | 30 | 38 |
| No opinion. | 5 | 5 |
|  | 14 | 12 |

For the second consecutive year ACIR probed the general public attitude on taxes and services. The responses in the March 1976 poll indicated that public interest in keeping taxes and services about where they are increased from $45 \%$ to 51\%.

A substantially smaller percentage of respondents in the March 1976 poll than in the May 1975 poll ( $30 \%$ as compared to $38 \%$ ) associated themselves with the statement "decrease services and taxes." In the 1976 poll, as in the 1975 poll, only one in 20 respondents felt a need to, "increase services and raise taxes."

Although every category except the farmers gave the "hold the line" policy more support than any other alternative, those most willing to decrease services and taxes in the March 1976 poll included respondents from the 50 through 59 year age group, the managerial and farmer occupational groups, the rural dwellers, those located in the West, and families with teenagers (Table 2A). Most of the categories of respondents were of the same mind in the May 1975 poll.

## The Revenue Instrument of Choice

| Table 3 |  |  |
| :---: | :---: | :---: |
| Suppose Your State Government Must Raise Taxes Substantially, Which of These Do You Think Would be the Best Way to Do It? |  |  |
|  | March 1976 | March 1972 |
| State Sales Tax | 45\% | 46\% |
| State Income Tax | 25 | 25 |
| State Property Tax | 10 | 14 |
| Other | 6 | 5 |
| Don't Know | 14 | 10 |

The public clearly favors the sales tax if state taxes have to be increased. These 1976 poll results closely match our findings in 1972-the last time this question was asked.

There are significant variations, however, when the responses are examined on a regional basis (Table 3A). Northeastern respondents picked the state sales tax much less frequently than did the respondents in the other three regions and the income tax received considerably less than average support in the South.

The strongest support for the sales tax came from families residing in new suburbs or in rural areas, upper income families, and those in the 50-59 age category.

Homeowners and renters also differed sharply on this tax increase issue-49\% of the homeowners favored a state sales tax increase as contrasted to only $35 \%$ of the renters. As might be expected, the property tax received considerably more support from renters ( $19 \%$ ) than from homeowners ( $6 \%$ ).

## Table 3A

Suppose Your State Government Must Raise Taxes Substantially Which of these Do You Think Would Be the Best Way to do it - State Income Tax, or State Sales Tax, or State Property Tax?

## The Revenue Sharing Rating

## Table 4

#### Abstract

In Addition to Providing Certain Moneys to State and Local Governments for Specific Purposes, the National Government Also Gives a Form of Federal Aid Called Revenue Sharing. Under This Program, State and Local Governments Receive About $\$ 6$ Billion a Year to Use as They Think Best. Do You Favor or Oppose This Revenue Sharing Form of Federal Aid?

|  | Percent of Total <br> U.S. Public |  |  |  |
| :--- | :---: | :--- | :--- | :--- |
|  | March | May | April | May |
|  | $\mathbf{1 9 7 6}$ | $\mathbf{1 9 7 5}$ | $\mathbf{1 9 7 4}$ | $\mathbf{1 9 7 3}{ }^{*}$ |
| Favor | $60 \%$ | $55 \%$ | $65 \%$ | $56^{\circ}$ |
| Oppose | 21 | 22 | 13 | 18 |
| No Opinion | $\mathbf{1 9}$ | 23 | 22 | 26 |

*In the 1973 poll, the question was worded slightly differently. See Appendix Table 4A for exact wording.

In the final year (1976) of the initial five-year Federal general revenue sharing program, three
out of five respondents favored the revenue sharing form of Federal aid. About one in five respondents expressed opposition to the program and another one in five respondents expressed no opinion.

The respondents in virtually all subclassifications favored revenue sharing by margins of two and one-half or three to one. Those who were the most supportive of local governments (question 1) were also those who gave Federal revenue sharing the strongest backing - the college educated, the professionals, the highest income group, and the homeonwers (Table 4A). It should be noted, however, that revenue sharing also received well above average support from city apartment dwellers-a group that was not pro local government in response to question 1.

Support for Federal revenue sharing rose from $55 \%$ in May 1975 to $60 \%$ by March of 1976. Most of this increase can be traced to the decline in the "no opinion" category which dropped from $23 \%$ to $19 \%$ during the same period. The current debate over the renewal of this program may explain this drop in the "no opinion" category.

## Special Federal Aid to Cities

## Table 5

## Many of Our Major Central Cities Are Experiencing Financial Difficulty. Would You Favor or Oppose Special Federal Aid for These Central Cities?

| Favor | $48 \%$ |
| :--- | :--- |
| Oppose | 40 |
| No Opinion | 12 |

Following the news coverage of New York City's fiscal crisis, a rash of stories emphasized the financial difficulties of other major cities. ACIR attempted to gauge the public attitudes on whether the Federal government should extend special financial aid to hard-pressed central cities.

Although the polling results indicate a clear plurality favor special Federal aid for central cities in financial difficulties, the results within respondent categories indicate a wide divergence of opinion along regional lines. For example, $70 \%$ of the respondents in the Northeast would favor a Federal program and only $22 \%$ would oppose it, whereas only $39 \%$ of the respondents in the South would favor the program and $46 \%$ would oppose it (Table 5A).

Some evidence of self interest is also apparent on socio-economic bases-opponents of aid to the big cities exceed proponents in such respondent categories as farmers, new suburban dwellers, and homeowners. Well above average support for this idea came from the young, city renters, and non-whites.

## The Poll

This report presents the findings of a personal interview research survey conducted among 2,127 men and women, 18 years of age or over, living in private households in the continental United States.

Interviewing for this Caravan Survey was completed during the period March 10 through April 2, 1976, by members of the Opinion Research Corporation national interviewing staff. All interviews were conducted in the homes of the respondents.

The most advanced probability sampling techniques were used in the design and execution of the sample plan; therefore, the results may be projected to the total U.S. population of men and women 18 years of age or over.

Only one interview was taken per household, regardless of the number of people 18 years of age or over in the household. Weights were introduced into the tabulations to ensure proper representation in the sample.

The tables read across. All figures in the body of the tables are percentages. Throughout the tables, an asterisk ( ${ }^{*}$ ) signifies any value less than one-half percent. Where percentages add to more than 100, it is because of multiple answers.

The following definitions are provided for some of the sidebreaks by which the data are analyzed. Other sidebreaks are selfexplanatory.

Occupation refers to the occupation of the chief wage earner in the household.

City Size is based on interviewer observation of the respondent's location in terms of area, and the age and type of dwelling. This sidebreak does not add to the total number of interviews,
as some respondents simply do not qualify within a definition. For example, a suburban garden apartment does not fit the description "single family dwelling."

For those categories that are not selfexplanatory, the following definitions are provided:

Old Suburb-single family dwelling in a small town or suburb built prior to World War 11.
New Suburb-single family dwelling built since World War II.
City-1 Family-single family dwelling within a metropolitan area.
City-Multifamily-multiple family dwelling, which would include a duplex, double house, residential house with more than one family living in it, etc., within a metropolitan area.

Income is total family income in 1975, before taxes.

Geographic Regions include:
Northeast: Maine, New Hampshire, Vermont, Massachusetts, Rhode Island, Connecticut, New York, New Jersey, Pennsylvania.
North Central: Ohio, Indiana, Illinois, Michigan, Wisconsin, Minnesota, lowa, Missouri, North Dakota, South Dakota, Nebraska, Kansas.
South: Delaware, Maryland, District of Columbia, Virginia, West Virginia, North Carolina, South Carolina, Georgia, Florida, Kentucky, Tennessee, Alabama, Mississippi, Arkansas, Louisiana, Oklahoma, Texas.
West: Montana, Idaho, Wyoming, Colorado, New Mexico, Arizona, Utah, Nevada, Washington, Oregon, California.

## TABLE G

Here are Some of the Reasons that People Give Us for Feeling that the Property Tax is Not a Good Tax. Which one of These Do You Feel is the Most Important Reason for Dissatisfaction With the Property Tax?

1. It is hardest on low income families.
2. It is based on estimates of home value that are not always fair.
3. Reassessments may sometimes result in a shocking tax bill increase.
4. It discourages homeowning.
5. It taxes any increase in the value of a home over the original purchase price, even though that increase is only on paper and not in the homeowner's hands unless he sells the house.
6. Property taxes have been going up faster than other taxes.
7. No opinion.
8. Don't agree that property tax is not a good tax.

## TABLE H

Here are Three Statements About Taxes. Which of the Statements Agrees Most with Your Own Thinking?

1. The Federal government should start a value added tax (a form of national sales tax) and use the money to help reduce local property taxes.
2. The Federal goverment should not start a value added tax (a form of national sales tax) but should raise individual income taxes to help reduce local property taxes.
3. The Federal government should take neither of these actions to help reduce local property taxes.
4. Don't know.

## TABLEI

A. Suppose the Federal Government Must Raise Taxes Substantially, Which of These do You Think Would be the Best Way to Do It?
B. Which Do You Think Would be the Next Best Way?

1. Collect a value added tax (VAT), a form of national sales tax on things other than food and similar necessities.
2. Raise individual income tax rates.
3. Raise money by reducing special tax treatment for capital gains and cutting tax deduction allowances for charitable contributions, state and local taxes, medical expenses, etc.
4. Don't know.

ACIR State Legislative Program, Part 3, State and Local Revenue (M-94) and Part 4, Fiscal and Personnel Management (M-95), (Washington, D.C.: Government Printing Office, November 1975).

Understanding the Market for State and Local Debt, An Information Report M-104, (Washington, D.C.: Government Printing Office, May 1976), 56 pp.

## What ACIR?

The Advisory Commission on Intergovernmental Relations (ACIR) was created by the Congress in 1959 to monitor the operation of the American federal system and to recommend improvements. ACIR is a permanent national bipartisan body representing the executive and legislative branches of Federal, state, and local government and the public.
The Commission is composed of 26 members-nine representing the Federal government, 14 representing state and local government, and three renresenting the public. The President appoints 20 -three private citizens and three Federal executive officials directly and four governors, three state legislators, four mayors, and three elected county officials from slates nominated by the National Governors' Conference, the Council of State Governments, the National League of Cities/U.S. Conference of Mayors, and the National Association of Counties. The three Senators are chosen by the President of the Senate and the three Congressmen by the Speaker of the House.

Each Commission member serves a two year term and may be reappointed.
As a continuing body, the Commission approaches its work by addressing itself to specific issues and problems, the resolution of which would produce improved
cooperation among the levels of government and more effective functioning of the federal system. In addition to dealing with the all important functional and structural relationships among the various governments, the Commission has also extensively studied critical stresses currently being placed on traditional governmental taxing practices. One of the long range efforts of the Commission has been to seek ways to improve Federal, state, and local governmental taxing practices and policies to achieve equitable allocation of resources, increased efficiency in collection and administration, and reduced compliance burdens upon the taxpayers.

Studies undertaken by the Commission have dealt with subjects as diverse as transportation and as specific as state taxation of out-of-state depositories; as wide ranging as substate regionalism to the more specialized issue of local revenue diversification. In selecting items for the work program, the Commission considers the relative importance and urgency of the problem, its manageability from the point of view of finances and staff available to ACIR and the extent to which the Commission can make a fruitful contribution toward the solution of the problem.
After selecting specific intergovernmental issues for investigation, ACIR follows a multistep procedure that assures review and comment by representatives of all points of view, all affected levels of government, technical experts, and interested groups. The Commission then debates each issue and formulates its policy position. Commission findings and recommendations are published and draft bills and executive orders developed to assist in implementing ACIR policies.
