FOREWORD

As part of its continuing research on fiscal federalism, the Advisory Commission on Intergovernmental Relations believes it is useful to determine public attitudes on major intergovernmental fiscal issues. Each year since 1972, the Commission has contracted with Opinion Research Corporation of Princeton, New Jersey, to gauge public opinion as to tax instruments, federal aid, and effectiveness of the levels of government. This publication presents both the current and cumulative record of these surveys.

This study was prepared by Will Myers, senior analyst, and John Shannon, assistant director, of the Commission's public finance staff. All interpretations of the data are those of the Commission's staff.

Wayne F. Anderson Executive Director

The Poll	5
Appendix Tables: Detailed Results of 1979-72 Surveys	7

HIGHLIGHTS

For the eighth consecutive year ACIR has participated in a general public caravan survey. The poll consists of personal interviews with 2,022 adults conducted by the Opinion Research Corporation during May and June, 1979. The results of the five questions on tax and other fiscal matters ranged from the surprising to the expected as the following highlights will show.

Rating Governments

For the first time since 1972, when ACIR began its annual polling, the federal government trailed local government on the question "From which level of government do you get the most for your money?" After an unbroken record of winning marks on relative effectiveness, the federal government dropped to the low point in public esteem – 29% – registered previously only in our 1974 poll (Table 1).

From Which Level of Government Do You Feel You Get the Most For Your Money — Federal, State, or Local?

Percent of Respondents by Region

	Northeast	North-Central	South	West
Federal	38	25	31	18
State	16	18	26	27
Local	30	40	27	40
Don't Know	16	17	16	15

The public estimate of local government's performance reached its all time, high mark in ACIR's 1979 poll. Even in the Nixon-Watergate period, when the federal rating dropped notably, local government performance did not get as high marks as it does currently.

State government's rating improved modestly over its level of recent years. But, this level of government continues to rank behind the local and federal level as it has since ACIR began asking this question.

The regional pattern of responses to this question demonstrates sharp variations in public perception of the three levels of government. Interestingly, the Northeast continues its previously established tendency to back the federal government most heavily. The North-Central and West regions clearly are local government partisans (Table 2). State government enjoys more support than the federal government in the West.

Among classes of respondents, local government drew its strongest support from the college

educated, the suburban resident, and the home owner (Appendix Table A-1).

Rating Major Taxes

By the time of ACIR's 1979 poll, the purgative powers of Proposition 13 had apparently had substantial effect. The turnaround between 1978 and 1979 in public sentiment on the property tax is remarkable. After years of neck-and-neck competition over the designation as the worst tax, the federal personal income tax emerged clearly as the most unpopular in ACIR's 1979 poll results (Table 3). This is not entirely startling since the ACIR poll pits one type of tax against the others. Results on this question are all relative—when one tax draws more support, others must draw less.

The regional distribution of responses to the worst tax question shows decided turnarounds among respondents. The West's opinion of the property tax and the federal income tax did a flip flop—antiproperty tax feeling dropped sharp-

May 1979	27	38	38	45

ly while the antifederal income tax response increased dramatically (Table 4).

What are the primary factors responsible for the relative rise in the unpopularity of the income tax and the rather dramatic decline in antiproperty tax attitudes? Four explanations appear plausible.

- 1. The Proposition 13 explosion in the West reduced the pent-up antiproperty tax feeling in that region of the country.
- 2. Growth in local property tax collections slowed due both to (a) more conservative spending policies at the local level, and (b) limitations on local tax and spending authority in several states.
- Many state legislatures have enacted new property tax relief measures and/or expanded old programs.
- 4. Individual income tax liabilities continue

to grow as inflation automatically pushes taxpayers into higher income tax brackets.

Again, a note of caution must be struck. The poll pits one type of tax against others in a "zero sum" game.

Rating Direction of Tax And Spending Trends

The overwhelming proportion of the American public continues to support a "go slow" policy on taxes and spending. When asked to choose among options after considering all government services on the one hand and taxes on the other, 85% of the respondents wanted to either decrease services and taxes or keep them where they are. This aggregate percentage response for the two options is slightly higher than the similar aggregate in 1977 and 1975 (Table 5). A larger

Increase Services and Taxes	6	4	5	5
No Opinion	9	13	14	12

percentage of respondents were willing to accept cuts in taxes and services in 1979 than in any previous year in which this question was asked.

The lowest percentage support for decreasing services (30%) occurred among nonwhites. The highest percentage for decreasing services and taxes (46%) showed up among men 30 to 44 years of age and for the West among the regions (Appendix Table B).

Rating General Revenue Sharing

General Revenue Sharing continues to enjoy the support of a majority (51%) of the American public. But, a larger percentage of respondents (30% in 1979) than in previous ACIR polls dating back to 1973 oppose the concept (Table 6).

Rating Special Federal Aid To Distressed Cities

The American public remains about equally divided on whether there should be special federal aid for fiscally distressed central cities (*Table 7*). In the 1979 ACIR poll 44% favored the idea, 43% opposed it.

Among respondent groups, the idea draws greatest support in the Northeast region, where much of the presumed benefit would occur. Strongest opposition appears in the North-Central and West regions. The response in the North-Central region is somewhat surprising because a number of the distressed cities are in states comprising that region. The aged opposed the idea with substantially greater frequency than younger respondents (Appendix Table 1).

Table 6

In Addition to Providing Certain Monies to State and Local Governments for Specific Purposes, the National Government also Gives a Form of Federal Aid Called Revenue Sharing. Under this Program, State and Local Governments Receive about \$7 Billion a Year to Use as They Think Best. Do You Favor or Oppose This Revenue Sharing Form of Federal Aid?*

THE POLL

This report presents the findings of a personal interview research survey conducted among a probability sample of 2,022 men and women, 18 years of age or over, living in private households in the continental United States.

Interviewing for this Caravan survey was completed during the period May 14 through June 4, 1979, by members of the Opinion Research Corporation national interviewing staff. All interviews were conducted in the homes of respondents, using a thoroughly pretested questionnaire.

The most advanced probability sampling techniques were employed in the selection of interviewing households and random selection of a designated respondent within the household. One callback was required in all cases where the originally designated respondent was not available at the time of the initial call to that housing unit. Only one interview was conducted per household. To further ensure the representativeness of the sample, data were subject to ORC's weighting program, which takes into account probability of being at home and six different demographic variables. Therefore, the results may be projected to the total U.S. population of men and women, 18 years of age or over.

Introduction to Detailed Findings

The tables contained in this report present detailed findings of the survey results. Where percentages add to more than 100, it is because of multiple answers.

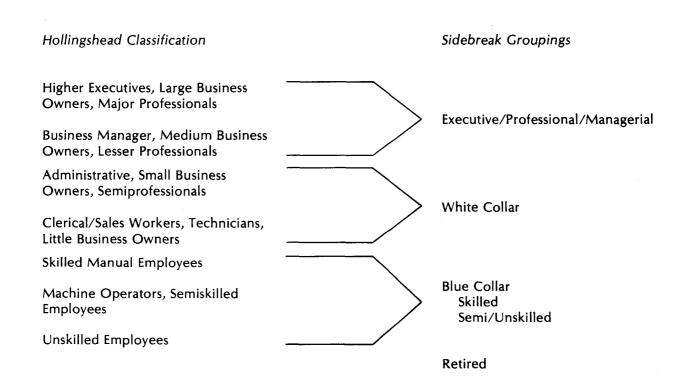

The following definitions are provided for some of the standard sidebreaks by which the data are analyzed. Other sidebreaks are self-explanatory.

Occupation refers to the occupation of the chief wage earner in the family. The 1979 questionnaire uses the Hollingshead classifications shown at the left below; the sidebreak collapses them as shown at the right and adds a retired classification.

The city size groups all respondents into one of three major categories — rural, suburb, or city — and is based on interviewer observation of the respondent's location in terms of rural, suburb and city, and the age and type of dwelling.

City dwellers are divided into two groups — those living in single family versus multi-family dwellings.

The four geographic regions are comprised as follows: Northeast — Maine, New Hampshire, Vermont, Massachusetts, Rhode Island, Connecti-

cut, New York, New Jersey, Pennsylvania; North-Central—Ohio, Indiana, Illinois, Michigan, Wisconsin, Minnesota, Iowa, Missouri, North Dakota, South Dakota, Nebraska, Kansas; South—Delaware, Maryland, District of Columbia, Virginia, West Virginia, North Carolina, South Carolina, Georgia, Florida, Kentucky, Tennessee, Alabama, Mississippi, Arkansas, Louisiana, Oklahoma, Texas; West—Montana, Idaho, Wyoming, Colorado, New Mexico, Arizona, Utah, Nevada, Washington, Oregon, California.

The Nielsen Market Size groups respondents by A.C. Nielsen Company market size:

- A All counties comprising the 25 largest metropolitan areas;
- B All other counties having a population of 150,000 or more, or that form part of a metropolitan area having a total population of 150,000 or more;
- All other counties having a population of 35,000 or more, or forming part of a metropolitan area having a population of 35,000 or more; and
- D All remaining counties in the country.

 Income groups respondents by total family income in 1978, before taxes.

APPENDIX TABLE C

1979-73

In Addition to Providing Certain Monies to State and Local Governments for Specific Purposes, the National Government also Gives a Form of Federal Aid Called Revenue Sharing. Under this Program, State and Local Governments Receive About \$7 Billion a Year to Use as They Think Best. Do You Favor or Oppose This Revenue Sharing Form of Federal Aid.*

April 1974

Here are Some of the Reasons that People Give Us for Feeling that the Property Tax is Not a Good Tax. Which one of These Do You Feel is the Most Important Reason for Dissatisfaction with the Property Tax?

- 1. It is hardest on low income families.
- 2. It is based on estimates of home value that are not always fair.
- 3. Reassessments may sometimes result in a shocking tax bill increase.
- 4. It discourages homeowning.
- 5. It taxes any increase in the value of a home over the original purchase price, even though that increase is only on paper and not in the homeowner's hands unless he sells the house.
- 6. Property taxes have been going up faster than other taxes.
- 7. No opinion.
- 8. Don't agree that property tax is not a good tax.

APPENDIX TABLE H

March 1972

Here are Three Statements About Taxes. Which of the Statements Agrees Most With Your Own Thinking?

- 1. The Federal government should start a value added tax (a form of national sales tax) and use the money to help reduce local property taxes.
- 2. The Federal government should not start a value added tax (a form of national sales tax) but should raise individual income taxes to help reduce local property taxes.
- 3. The Federal government should take neither of these actions to help reduce local property taxes.
- 4. Don't know.

A. Suppose the Federal Government Must Raise Taxes Substantially, Which of These do You Think Would be the Best Way to Do It?

B. Which Do You Think Would be the Next Best Way?

- 1. Collect a value added tax (VAT), a form of national sales tax on things other than food and similar necessities.
- 2. Raise individual income tax rates.
- 3. Raise money by reducing special tax treatment for capital gains and cutting tax deduction allowances for charitable contributions, state and local taxes, medical expenses, etc.
- 4. Don't know.

Which of These Statements Comes Closest to Your View **About Government Power Today?**

(in percent)

Federal government has too much power.
 Federal government is using about the right amount of power for meeting today's needs.
 Federal government should use its powers more vigorously to promote the well being of all segments of the people.

The reports of the Advisory Commission on Intergovernmental Relations are released in four series: the "A" series denotes reports containing Commission recommendations; the "M" series contains information reports; the "S" series identifies reports based on public opinion surveys; and the "B" series contains "In Brief" summaries of "A" and "M" reports. Single copies of ACIR publications are available from: ACIR, 1111-20th Street, NW, Washington, DC 20575, Attn: Ruth Phillips. Multiple copies may be ordered from the U.S. Government Printing Office, Washington, DC.

The Advisory Commission on Intergovernmental Relations (ACIR) was created by the Congress in 1959 to monitor the operation of the American federal system and to recommend improvements. ACIR is a permanent national bipartisan body representing the executive and legislative branches of Federal, state, and local government and the public.

The Commission is composed of 26 members-nine representing the Federal government, 14 representing state and local government, and three representing the public. The President appoints 20-three private citizens and three Federal executive officials directly and four governors, three state legislators, four mayors, and three elected county officials from slates nominated by the National Governors' Conference, the Council of State Governments, the National League of Cities/U.S. Conference of Mayors, and the National Association of Counties. The three Senators are chosen by the President of the Senate and the three Congressmen by the Speaker of the House.

Each Commission member serves a two year term and may be reappointed.

As a continuing body, the Commission approaches its work by addressing itself to specific issues and problems, the resolution of which would produce improved

cooperation among the levels of government and more effective functioning of the federal system. In addition to dealing with the all important functional and structural relationships among the various governments, the Commission has also extensively studied critical stresses currently being placed on traditional governmental taxing practices. One of the long range efforts of the Commission has been to seek ways to improve Federal, state, and local governmental taxing practices and policies to achieve equitable allocation of resources, increased efficiency in collection and administration, and reduced compliance burdens upon the taxpayers.

Studies undertaken by the Commission have dealt with subjects as diverse as transportation and as specific as state taxation of out-of-state depositories; as wide ranging as substate regionalism to the more specialized issue of local revenue diversification. In selecting items for the work program, the Commission considers the relative importance and urgency of the problem, its manageability from the point of view of finances and staff available to ACIR and the extent to which the Commission can make a fruitful contribution toward the solution of the problem.

After selecting specific intergovernmental issues for investigation, ACIR follows a multistep procedure that assures review and comment by representatives of all points of view, all affected levels of government, technical experts, and interested groups. The Commission then debates each issue and formulates its policy position. Commission findings and recommendations are published and draft bills and executive orders developed to assist in implementing ACIR policies.
