

Code Monkey Island

Grades 9

Audience & Play

- » Ages 6+
- » 2-4 Players
- » 45 Minutes

Board Game Description

Code Monkey Island is a family-friendly board game that introduces kids ages 8 and up to programming concepts used by real programmers. It takes about a minute to learn the rules and 45 minutes to play, and exposes kids to fundamental programming concepts like control structures, data structures, Boolean logic and operators, and assignment and mathematical operations.

Skills & Mechanics

- » Card Drafting
- » Route Building
- » Pattern Recognition
- » Board Game
- » Programming Language
- » Computer Science

Alignments

TEKS

126.33(c)(6): Technology Applications. Technology operations, systems, and concepts. The student understands technology concepts, systems, and operations as they apply to computer science.
